Enterprise Risk Management: A Common Framework For The Entire Organization

Synopsis

Enterprise Risk Management: A Common Framework for the Entire Organization discusses the many types of risks all businesses face. It reviews various categories of risk, including financial, cyber, health, safety and environmental, brand, supply chain, political, and strategic risks and many others. It provides a common framework and terminology for managing these risks to build an effective enterprise risk management system. This enables companies to prevent major risk events, detect them when they happen, and to respond quickly, appropriately, and resiliently. The book solves the problem of differing strategies, techniques, and terminology within an organization and between different risk specialties by presenting the core principles common to managing all types of risks, while also showing how these principles apply to physical, financial, brand, and global strategy risks. Enterprise Risk Management is ideal for executives and managers across the entire organization, providing the comprehensive understanding they need, in everyday language, to successfully navigate, manage, and mitigate the complex risks they face in today's global market. Provides a framework on which to build an enterprise-wide system to manage risk and potential losses in business settings. Solves the problem of differing strategies, techniques, and terminology within an organization by presenting the core principles common to managing all types of risks. Offers principles which apply to physical, financial, brand, and global strategy risks. Presents useful, building block information in everyday language for both managers and risk practitioners across the entire organization.

Customer Reviews

"...an authoritative work, it best belongs in the enterprise risk management department of an organization, on the chief risk officer's desk, in internal audit, and most importantly, in the CEO's office." --ASIS Online

Philip Green is CEO of First Resource Management Group Inc., which manages forests in Canada. Before this he was president of Greenbridge Management Inc., which provided risk management, process management, continuous improvement and statistical consulting services to industries in North and South America, Europe and Asia. He is co-author of *misLeading Indicators: How to Reliably Measure your Business* (with Prof George Gabor of Dalhousie University) published by Praeger. He has an M.Sc. in Statistics from McMaster University (1984).
