Neuropsychological Evaluation Of Somatoform And Other Functional Somatic Conditions: Assessment Primer (American Academy Of Clinical Neuropsychology/ Psychology Press Continuing Education Series)

Synopsis

Neuropsychologists are provided with little formal education and training regarding the identification and measurement of somatoform symptoms, yet these conditions are highly prevalent, with estimates indicating that 20% of general medical patients and 30% of neurologic clinic patients present with symptoms lacking medical explanation. This book provides neuropsychologists with comprehensive information and specific practice recommendations for the assessment of patients with somatoform conditions. The first four chapters discuss the genesis of somatoform and other functional somatic symptom disorders, and the next seven chapters address somatoform conditions in the context of nonepileptic seizures, multiple chemical sensitivity and other claimed toxic exposures, pseudotremor and other nonphysiologic movement disorders, postconcussion syndrome, chronic pain/fibromyalgia/complex regional pain syndrome, attention deficit disorder, and auto-immune disease. Chapters are also included that address the use of the MMPI-2-RF in differentiating somatoform disorder and malingering, medically unexplained symptoms in non-English-speaking individuals; workplace factors in somatization; and testimony involving somatoform conditions. The book is targeted for practicing neuropsychologists, clinical psychologists including those specializing in behavioral medicine, and students in training.

Book Information

File Size: 3353 KB

Print Length: 462 pages

Simultaneous Device Usage: Up to 4 simultaneous devices, per publisher limits

Publisher: Psychology Press; 1 edition (March 16, 2017)

Publication Date: March 16, 2017

Sold by:Â Digital Services LLC
