Nancy J. Ondra is the author or coauthor of more than a dozen gardening books. She grows a wide variety of ornamental and edible plants at Hayefield, her 4-acre homestead in Bucks County, PA.

Very informative.

Nice. I love her other book "perennial book manual" much better.

A very helpful book for planting combos of plants.

Very interesting approach to companion planting... look for what you already have in your garden, then view the list of plants which would go well with it / take the garden bed to the next level of interest and appeal. Includes specific names / varieties, soil, sun & water needs, and even includes the hardiness zones... very important in my Zone 3 garden. I like this book a lot. I would have given it five stars, but I got the kindle (digital) version for portability and it does not allow me to zoom in well enough to read some of the charts ...

Just what I was looking for.

Very personable and detailed writing with loads of knowledge and experience behind everyAn interesting read even for garden designers. If you like her Hayefield blog, you'll like her books at least as much. To beginner DIY gardener who must choose between the two books, would recommend her Five-Plant Gardens book as a great way to hurdle past design dilemma and just DO. This book can later help add even more color and interest when ready to expand your garden
