Customer Reviews

4-Star Review!"This is an unparalleled resource in both content and authority for pediatric infectious diseases knowledge, from diagnosis to management and prevention." Kari A. Simonsen, MD, University of Nebraska Medical CenterDoody's Book Review

Editor: David W. Kimberlin, MD, FAAP is the Principal Investigator for the Collaborative Antiviral Study Group (CASG), a network of pediatric academic medical centers that evaluates antiviral therapeutics in rare diseases with a large unmet medical need, including neonatal herpes simplex virus (HSV) infections, congenital cytomegalovirus (CMV) disease, neonatal and infantile influenza infection, neonatal enteroviral sepsis syndrome, and juvenile-onset recurrent respiratory papillomatosis. Studies conducted by the CASG have led to new drug indications and label changes for acyclovir, valganciclovir, and oseltamivir, and non-CASG studies conducted by Dr. Kimberlin also have led to label changes for valacyclovir. Dr. Kimberlin is Editor of the 2015 AAP Report of the Committee on Infectious Diseases (Red Book), and will be the editor for the 2018 edition as well. He is Past-President of the Pediatric Infectious Diseases Society (PIDS), which is the world's largest organization of professionals dedicated to the treatment, control, and eradication of infectious diseases affecting children. Dr. Kimberlin also serves as Vice Chair for Clinical and Translational Research in the UAB Department of Pediatrics, where he holds the Sergio Stagno Endowed Chair in Pediatric Infectious Diseases and is Co-Director of the Division of Pediatric Infectious Diseases. Associate editors: Michael T. Brady MD, FAAP is Professor of Pediatrics at The Ohio State University and Associate Medical Director at Nationwide Children's Hospital. Dr. Brady was on the AAP Committee on Infectious Diseases from 2005 until 2014 (Chair from 2010 to 2014). Dr. Brady was an Associate Editor of the 2015 Red Book. Dr. Brady received his medical degree from Jefferson Medical College in Philadelphia. His pediatric residency was completed at Nationwide Children's Hospital in Columbus, Ohio and Baylor College of Medicine in

Houston. His pediatric infectious diseases fellowship was at the Baylor College of Medicine. Dr. Brady's special interests include HIV infection, healthcare-associated infections, perinatal infections and vaccine-preventable infections. He is currently a member of the Board of Scientific Counselors of Infectious Diseases at the Centers for Disease Control and Prevention.

Mary Anne Jackson, MD, FAAP: Following residency at Cincinnati Children's and fellowship at the University of Texas Southwestern, Dr. Jackson has been a faculty member at Children's Mercy Hospital, Kansas City since 1984 where she is Division Director of Infectious Diseases. She has won numerous teaching awards and was honored in 2012 as the outstanding graduate at the University of Missouri-Kansas City School of Medicine. A fellow of the AAP, the Infectious Disease Society of America and the Pediatric Infectious Disease Society, she has also been elected to the American Pediatric Society, the Society of Pediatric Research and the Academic Pediatric Association. She has been a member of the AAP Committee on Infectious Diseases since 2009, and is an Associate Editor of Red Book since 2015. She has authored over 150 peer reviewed publications focusing on strategies to reduce the incidence of hospital acquired infection, judicious use of antibiotics, prevention of antibiotic resistant infection and vaccine implementation and education.

Sarah S. Long, MD, FAAP is Section Chief of Infectious Diseases at St. Christopher's Hospital for Children in Philadelphia, PA. Dr. Long is also Professor of Pediatrics at Drexel University College of Medicine. Dr. Long is an associate editor of The Journal of Pediatrics and is the chief editor of the textbook Principles and Practice of Pediatric Infectious Diseases. She has received numerous teaching awards, the Distinguished Service Award of the Pediatric Infectious Diseases Society, the Clinical Teacher Award of the Infectious Diseases Society of America, and the Award for Lifetime Contribution to Infectious Diseases Education by the Section on Infectious Diseases of the American Academy of Pediatrics. Dr. Long completed her medical degree at Jefferson Medical College in Philadelphia, and her residency and fellowship at St. Christopher's Hospital for Children. She is board certified in pediatrics and pediatric infectious disease, and her principal areas of research are vaccine-preventable diseases and management of common infectious diseases in children. She sits on advisory committees for the National Institutes of Health, the Food and Drug Administration and the Centers for Disease Control and Prevention.

This is a huge wealth of information, very valuable. However, the pages are coming out from the center. Very disappointing.

I love this book, it is so very useful in my practice, but when I opened the book a page was not intact, this makes it difficult to thumb through, I am waiting to see if I can get it replaced.

Just as described. Fast shipping.

This is a counterfeit Red Book! The AAP sent out an alert about this with what to be on the lookout for and this is one of the fakes. The word disease is spelled wrong on the spine of the cover.

Excellent book. Great review of guidelines. Only thing wrong is that this version I received is missing about 20 pages. I was disappointed because the missing page information is what I needed to read up on.

Excellent book on relevant up to date reviews. However information is lacking in which vaccines should not be given at the same time on a single visit and the intervals of such vaccinations should be spaced apart . Reasons for such recommendations could preferably be discussed.

"Must have" - for pediatricians. Quick answers for all infectious diseases in childhood!

This is an excellent communicable disease reference
