# Fear Of The Invisible

## Synopsis

This book takes its readers on a journey into the very heart of the hunt for viruses - to the key experiments originally performed to prove that these invisibly small particles are the cause of diseases previously blamed on toxins or bacteria and into the latest research. It sheds light on the extraordinary assumptions that underlay much of this research - and on the vaccines that developed from this. The author, an investigative journalist who has researched and produced investigative films for the BBC, American and Australian television, was asked by parents with children severely ill after vaccination, to discover if the medical authorities were hiding anything from them. She agreed, but had no idea how long this search would take. She expected at best to uncover a small degree of contamination. On the ensuing decade-long journey of discovery, she learnt it is not just the added mercury that we have to worry about. She discovered that the top government scientists admit to colleagues that vaccines are contaminated with viruses from chickens, humans and monkeys, with RNA and DNA fragments, with 'cellular degradation products', and possibly 'oncogenes and prions.' They report alarmingly that it is impossible to commercially purify vaccines. They express great concerns, but the public is not told despite the possible consequences for long-term public health. A recent US court decision has linked autism with vaccine contamination. The author cites her sources by name - and gives references and Internet links where they are available. | She reveals evidence that the World Health Organisation has discovered the MMR vaccine is contaminated with chicken leukosis virus, but has decided not to tell the public of this, and to continue to make the vaccine with eggs from contaminated chickens. She reports US biowarfare researchers tried to create new agents to destroy our immune systems - and worked on a bacterium to make it a hospital superbug. Did they manage to create HIV? A senior professor told her that the vaccine program was so contaminated that HIV might well have spread though it without any need for military intervention. She set out to find the evidence to resolve this, and to learn how HIV apparently spread so far and fast. She needed to know more about this virus so went to the foundation research widely held today to have found HIV and proved it caused AIDS. She was then rocked to discover that this same research was investigated for scientific fraud for a five year period by powerful US scientific institutions and by Congress,. Why is this not widely known? She found their reports and discovered they found major errors in this research, some so serious that these made it impossible to repeat these experiments and thus to verify them! She reveals the evidence unearthed - reproducing key documents so the reader can assess them for themselves. This is explosive material. In the final part of this book the author reports recent research that is revolutionising biology and offering much hope for the future. These new developments shed new

light on the relationships between our cells and viruses. They are not necessarily enemies. Readers may find these new developments radically change the ideas they have held about viruses since childhood. This book has over 500 references and includes several documents unearthed under Freedom of Information legislation. It has a scientific glossary and is fully indexed..

## Book Information

Paperback: 310 pages

Publisher: Impact Investigative Media Productions (June 30, 2008)

Language: English

ISBN-10: 0955917727

ISBN-13: 978-0955917721

Product Dimensions: 6.1 x 0.7 x 9.2 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 27 customer reviews

Best Sellers Rank: #515,258 in Books (See Top 100 in Books) #103 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Immunology](#) #106 in [Books > Medical Books > Medicine > Internal Medicine > Pathology > Diseases > AIDS & HIV](#) #192 in [Books > Medical Books > Basic Sciences > Immunology](#)

## Customer Reviews

Janine Roberts has a long history of taking on tough investigations - and this she believes is one of her toughest. Cynthia McKinney, the Green Party candidate for US President in 2008 and former Senior Democrat Congresswoman, said of the author: 'Janine Roberts is the rare individual who unflinchingly speaks truth to power. She battles her way through all obstacles and provides us with a glimpse of those who are in the innermost circles of global power... She exposes what they do and how they do it and how it comes to hurt us all. She gave testimony for me at a Hearing in Congress that was shocking in its revelations but thorough in its documentation... I count myself among the privileged of this world to know Janine and her works.' Dr Roberto Giraldo reported of this book that it is written 'in elegant detail and in a most accessible manner'. He also said: 'It is very comforting to read in *Fear of the Invisible*: 'We have all been taught to greatly fear viruses - yet scientists are now discovering that they are fundamental parts of life, made by the million by all healthy cells. I hope this book will help by combating this fear, this damning of the invisible because we do not understand it. Without this fear, hopefully the focus in medical research will shift to looking more at the environmental toxins that really do put us, and our world, gravely at risk.'

Janine Roberts is an international investigative journalist of some 40 years standing, during which time she has written for major newspapers in the UK and Australia, authored historical and investigative books and made investigative films seen on US, UK and Australian television.

Janine Roberts is that rare thing in this modern world of mostly "bought" journalists, a true investigative journalist. Just like the paralysis that was blamed on the polio virus, but was caused by exposure to toxins (historically associated only with metalworking, and beginning in the 1890's with pesticides, first lead arsenate, and later, DDT), what came to be called AIDS, and blamed on a retrovirus, was clearly toxin-mediated, primarily by inhalants such as amyl nitrate, of which the early victims were using enormous amounts. The toxicologists at the CDC were convinced, but the director realized that this just wouldn't do because there was no pharmaceutical profit involved in this approach, so he invented AIDS. In San Francisco, activists successfully educated the community about the role of amyl nitrate in these frightening illnesses, and the rate of illness dropped dramatically. But the CDC put pharma in charge, then kept broadening the diagnosis to stoke fear. Some healthy people who were "HIV positive" began taking the very costly anti-retroviral drugs, at which point their health declined (these are very dangerous chemotherapy drugs). She writes in detail about the NIH's Robert Gallo's fraudulent work and fraudulent "HIV test." He only escaped prosecution because of the statute of limitations, and to this day receives tax money for his "AIDS research." And his "HIV test" is still widely used, though worthless and dangerous.

This book goes deep into the historical record to uncover one of the greatest frauds of the 20th century. Viruses are not what people think they are. They are a smokescreen for toxicity. Roberts goes through the history of polio, hiv and more to uncover the way government and industry science work together to confuse the public and even most scientists and science students. She cites her work extensively. Everything she discusses is from the legit historical record. She pours through the letters, the rough drafts, the memos, the back pages of old newspapers, etc. She uncovers the compromises, the guesses, the outright lies. You will never see viruses, disease or government science the same after reading this book. And your health will benefit for it.

a truly amazing piece of journalism. A few months ago, I heard about an article published in The Ecologist stating that polio was caused by pesticides. I was intrigued by the premise, and searched the archives of the mag to no avail. I called and asked if they could track down the article. they did,

and sent it to me. It was revelatory. I got interested in the journalist, and searched to see what else she had written, and came up with this book. there was not a page in the book that was not unadulteratedly absorbing to me. Janine Roberts has become my hero.

This book should be on everyone's MUST READ list. Janine Roberts did her research, all pages have footnotes telling where she got her information. We need to WAKE UP and take responsibility for our own health...stop depending on a very corrupt and messed up medical system. It is all about GREED (as well as prestige and power!) and nothing about health.

Incredibly detailed and fastidiously referenced. This book details some of the greatest crimes and lies of the orthodox western medical system. From the history of vaccinations to the baseless science that became HIV/AIDS, it's covered with astounding dedication to detail. This is a "must read" for anyone interested in taking responsibility for their own health. It's astounding to think, that the only reason HIV still exists today could be due to the statute of limitations.

One of the more important books I have read. Not only is the research material good, but the book as whole helps one to understand the game that the Gatekeepers of Medical Orthodoxy play. That game is: thru clever PR stamp out the competition and all other research approaches.

an interesting book about the so call plague of our time. the book puts in doubt the existence of AIDS. I recommend that you read it.

Valuable data - the publication of Dr. Gallo's edited notes is invaluable and if ever publicized should eliminate the fiction of HIV, the only great medical discovery which is unaided by any scientific backing.
