Live Fast Die Hot

Synopsis

By the New York Times best-selling author, an outrageous collection of personal essays about adulthood, responsibility, and other potential disasters. Jenny Mollen is a writer and actress living in New York. Until two years ago, her life was exciting, sexy, a little eccentric, and 100 percent impulsive. She had a husband who embraced her crazy - who understood her need to occasionally stalk around the house in his ex-girlfriend's old beach caftans and to invite their drug dealer to Passover seder (so he wouldn't feel like they were using him only for drugs). Then they had their son, Sid, and overnight Jenny was forced to grow up: to be responsible, to brush her hair, to listen to her voice mail. *Live Fast Die Hot* is a collection of stories about what happens when you realize that some things are more important than crafting the perfect tweet. It follows Jenny to Morocco, where she embarks on a quest to prove to herself that she can travel alone without reenacting a plotline from *Taken*. It shows her confronting demons - most of them from childhood, a few from the spirit realm. And it culminates in Peru, where Jenny decides that maybe the cure for her worries lies at the bottom of a cup of ayahuasca. Hilarious, outlandish, and surprisingly affecting, *Live Fast Die Hot* reminds you that even if you aren't cut out for adulthood, at least you can be better at it than your mother.

Book Information

Audible Audio Edition

Listening Length: 6 hours and 50 minutes

Program Type: Audiobook

Version: Unabridged

ASIN: B01EM377AQ

Best Sellers Rank: #93 in Books > Audible Audiobooks > Humor > Essays #176 in Books >

Parenting & Relationships > Family Relationships > Motherhood #180 in Books > Audible

Audiobooks > Biographies & Memoirs > Entertainers & Celebrities

Customer Reviews

If you don't know who Jenny Mollen is you're missing out- granted I've never read her first book and I didn't know she existed until about six months ago when I stumbled upon her page on Instagram- I

love this book! She's the only person brave (or crazy) enough to write down what we all think in our heads. Her humor and view of life is along the lines of Chelsea Handler, Lena Dunham, or even Jim Gaffigan- it's bold, honest, and totally relatable. No, I don't own a Birkin (or have a fake bag guy lol) and I definitely could have used a nanny/nurse for my first and second child but despite the lifestyle and celebrity status that most of us aren't privy to she's still Sid's mom and Jason's wife and totally winging it like the rest of us. If you aren't then you're either a) lying or b) you came out of the womb Benjamin Button style and were probably doing your parent's taxes at the age of three and you wouldn't appreciate the honesty in this book. It's easy to read, covers a variety of life's ups and downs, and made me laugh out loud so often my husband banished me from the couch while reading it because I was disturbing his game. Is it an instant literary classic with copious amounts of symbolism, syntax, and the answers to all of life's great mysteries? No, but is it hysterical and a great break to read while I'm nursing my newborn and my toddler is drawing on every surface possible with a black crayon- yes! If you're a mom or about to be a mom I'd add this to the short list and get ready to laugh.

Jenny Mollen is hilarious! I saw her initially on Chelsea Handler's various shows with her husband, Jason Biggs. I never been a huge fan of him, but when I saw them interviewed together I thought they were just so funny and adorable together, so I started following them on Instagram and purchased Jenny's book. I didn't read her first book, but I'll definitely go back and read it now. She is such a down to earth celebrity and says everything moms and wives wish they'd say!

I have read both of Jenny Mollen's books and have enjoyed them both very much. I love reading books written by real people, telling real stories. And, if I can laugh while I'm at it, it's a bonus. She really just says what all of us women feel, but mostly sound ridiculous if we say it out loud. Thank you for sharing your stories.

Jenny Mollen is a hilarious, irreverent American treasure. She says what we're all thinking but it comes out 10 times funnier. She writes like a friend telling you a story, the kind that makes you listen so intently for what happens next that you forget to eat your lunch. I laughed and laughed and even cried a little. Read the book. You'll like it. Unless you're particularly conservative; then you'll probably think she's the devil and be scandalized forever.

This was a great read - a quick read, bc you don't want to put it down. Jenny's so relatable to moms.

Her writing style is great - she's sharp, very funny, super realistic...she says/writes what most people really think but might not have the guts to say out loud. I loved her book, and I loved how you can feel just how much she loves her son and how important being a "good mom" is to her. If what she's writing is true, I'd say she's a great mom and she's going to give her little guy a wonderful childhood full of fun memories.

I couldn't stop laughing the whole time I was reading this book. Not to mention the fact that Jenny's writing is very well structured and she made it very easy to connect with her as an author. Maybe I just felt that way because I'm crazy and she might be too, either way this is a must read!

I love crazy funny people, and Jenny is definitely one of them. If you're looking into light entertainment, easy enjoyable read, this book will make you laugh out load. Also, I find this book to be brutally honest, an honesty that allows you to step back and watch the current culture, the obsessions, the figuring out what is this thing called 'life' and finding the meaning to our existence through clever tweets on twitter. only to come to a full circle that your full potential, based on Jenny, is by having a baby, like in the old days, the man will go and do farming thingy things and the woman will have babies. In conclusion, I guess this book will make you laugh all the way to a cry, which is not easy to do, I have much respect

Her first book was hilarious, this one is awful! It's not funny at all. I just got to a chapter where she is telling a story about her neighbors smoking in their condo, in a building NEXT TO the one she's staying in, and she is freaking out about it. What nerve to think she can tell other people what to do in their own home. She needs to get over herself. I can't even finish the book it's so bad. If you want funny don't bother with this book.
