Customer Reviews

I bought this as a gift for my three year old niece who is very in to city bird watching. She has a North American bird guide that is meant for adults, but I thought this might serve her well. According to her mother, she loves it!

We purchased this book (and several others like it, but different topics) for our grandchildren. My husband and I both looked at them when they came and we loved them ourselves! The pictures are great and the print is the perfect size. I think it gives enough information, but not too much information. It's not so long that the kids will get bored before they are finished reading it.

excellent book for kids. The illustrations, for the most part, are accurate and true to life. As long time

birder I have learned new facts as I read the info to my granddaughter. We are in Michigan and the birds covered are very relevant to our area.

Well done book, purchased for my bird loving granddaughter to take with camping

went with a pair of binoculars, the child loved it

Beautiful. Love this series for my classroom.

A great book for a child's love of birds.
