Hurricanes (Disasters Up Close)

Synopsis

What if whipping winds and a wall of water descended on your neighborhood? As one of Earth's fiercest natural disasters, hurricanes can demolish buildings, uproot whole trees, even wipe out entire communities. The rushing water of the storm surge also carries away cars and rubble. With dramatic images and first-hand survivor stories plus the latest facts and figures this book takes you inside the destruction of hurricanes.

Grade Level: 3 - 6

Customer Reviews

Grade 4 "Bright colors, photographs, and charts make up much of these standard titles that examine how these phenomena are formed, where they are located, and the devastation wreaked by them. Both books discuss international and American disasters, including Hurricane Katrina in the first title. The second one has a list of volcanoes available to visitors. Good choices for collections that need newer or additional material."
