Borders Of Infinity (Three Miles Vorkosigan Adventures)(Library Edition)

Synopsis

Lois McMaster Bujold offers three more tales in the Hugo and Nebula award-winning Vorkosigan Saga, called "space opera at its best" by Publishers Weekly. The popular adventures of Miles Vorkosigan, a clever and outlandish science-fiction hero for the modern era, continue in these three tales. In *The Mountains of Mourning*, Miles is dispatched to a back-country region of Barrayar, where he must act as detective, judge, and executioner in a controversial murder case. In *Labyrinth*, Miles adopts his alternate persona as Dendarii Mercenary Admiral Naismith for an undercover mission to rescue an important research geneticist from Jackson's Whole. And in the title story, *Borders of Infinity*, Miles infiltrates an escape-proof Cetagandan POW camp and plays hero to the most deeply distressed damsel of his colorful career.

Customer Reviews

This collection of short stories includes tales that take place before *The Vor Game* and others extending past *Brothers in Arms*. The variation in tone across the tales is handled exceptionally well, as we see Miles mourn and get a better look at his relationship with Illyan. The stories include Miles's first outing as a detective, in which he's faced with a case of infanticide in the mutant-phobic hill country; his largest rescue mission ever; and the most distressed damsel for whom he ever played the knight. --This text refers to an alternate Audio CD edition.

Reader's Chair continues its inexorable and much appreciated march through the Bujold canon with

this latest rendition of the 1989 collection of three Vorkosigan adventures. The first and most successful story, "The Mountains of Mourning," is a Hugo and Nebula Award-winning tale that finds Miles dispatched by his emperor father to investigate an infanticide in a rural and provincially minded region. In "Labyrinth," Miles covertly travels to wild Jackson's Whole as Dendarii Mercenary Admiral Naismith on an undercover mission to extract an important research geneticist who mandates the destruction of his last surviving experimental creature as a condition of his departure. In the title story, Miles infiltrates a Cetagandan prison and performs a memorable poetic dance before women. A thread that works better in print than on audio is the dialog between Miles and Simon Illyan, chief of Barrayar's Imperial Security, which introduces each story. Here, it is confusing, abrupt, and unnecessary. Michael Hanson and Carol Cowan, as they have so often in the past with Bujold's work, once again assert their sure and confident narrative control over the material. Essential for all sf collections. DBarry X. Miller, Austin P.L., TX Copyright 2001 Reed Business Information, Inc. --This text refers to an alternate Audio CD edition.

LOVE LOVE LOVE her Miles series. He solves his problems by out thinking his opponents and outside of all boxes. His home world is military minded so the stories have some violence, but not an over abundance and any sex is talked of but no graphic descriptions. Miles gets into the middle of a mess and the mystery is how he can get out of it with the least amount of damage. The first story is set after the Warrior's Apprentice, and is him out thinking a murderer. No sex, the murder is before the story, and minimal violence. The second and third stories are set before Brothers in Arms. Miles is "picking up" a scientist who has lost track of his life's work and won't leave without it - always expect complications with Miles involved. The same with the next story - he is to get one prisoner of war out of a jail, but decides he is breaking out all the prisoners instead.

In a society that spent hundreds of years killing off "Muties", the genetically damaged children of parents who's great-great-grandfathers were exposed to radiation during the nuclear holocaust that threw this civilization back to the stone age, Miles looks like one of their number. But he isn't; his warped and damaged body was created because his mother was subjected to a chemical attack while he was in the womb, and the chemical poisons damaged his fetal development. His earliest memory is waking up to find his own grandfather trying to strangle him to death to cleanse the "impure genes" from his bloodline, only stopped by his father. The world Miles was born into has been once more rediscovered by the star faring humanity who originally settled it, and the imperial houses who rule his planet are fighting for their place and survival among the stars. Miles has a

head start on the process, since he had to fight harder than that just to be able to live to maturity, and some in the government recognize the value in his style and techniques. This collection of short stories gives you a peek at how he developed over the years, and what some of the challenges he faced were. It gives you the flavor of the Vorkosigan universe, and most of all it gives you some wonderful stories about someone who refused to turn aside just because the going got tough, and solved every one of the problems he ran into with his wits. Lois McMaster Bujold is an amazing author, and for me, this is flat out her best series.

Love this author although her combination publications (combo books versus purchasing each story separately) can be really confusing and sometimes, costly.

This is only a short story, but it won well deserved awards when it was first published. This is the kind of story where you have no idea what is going on at first, but slowly the author leads you to understand. True genius, IMHO. Human interest, drama, psychological thriller, human nature at its worst and best. I can't recommend Bujold enough, and this story, even though short, was worth the money.

Dear Readers!! started reading this series back in the late 1980's while still working offshore. A 12 hour shift was disappeared immediately! Just this winter I rediscovered them and found several stories I had not read. 20-25 years experiences and well over a decade in Balkans and Eastern Europe make me appreciate the depth of research and cultural sharing that support a Superb Storyteller!! recommend Heartily, especially to youngsters who are following a Science-Math-Tech career, for the depth of humanity, the rich pattern of describing a primitive physical culture assimilating high tech lifestyle and values, and "Just Plain Fun"!

Another wonderful read.

Normally, I dislike reading short stories: there's just no time to fully flesh out the characters. However, in this case, since these are part of the Miles Vorkosigan saga (and we're all familiar with him, his background, and his environment by now), I loved them. Each of the three short stories in the collection ("The Mountains of Mourning," "Labyrinth," and "The Borders of Infinity") are about 100 pages long, very interesting, and very well done. These short stories are also not peripheral to Miles' story. They seem to be covering central aspects of Miles and the Dendarii. The only downside

to the book is that the three stories, though published in this one book, take place between different sets of the major books. Specifically, the first of the short stories happens during the short gap between Miles' graduation from the Academy and his first military assignment (i.e., between *The Warrior's Apprentice* and *The Vor Game*). While the second and third stories occur after *Cetaganda* and before *Brothers in Arms*. Nothing insurmountable, but it's disconcerting. I rate it an excellent 5 stars out of 5.

A friend recommended Bujold's Vorkosigan books and I am working my way through the series. I have read 10 books in the series so far. These are a lot of fun, and Miles Vorkosigan is the most interesting character I've come across in a very long time. If you were wondering -- read this, read more. You will love these!
