Customer Reviews

In 2000, Teach for America alumnus and Yale graduate Zeke Vanderhoek had a radical idea: students learn better from better teachers. His vision of what test prep could be if written and taught by great educators led him to start Manhattan Prep. Since we began, Manhattan Prep has grown

from a boutique tutoring company to one of the world's leading test prep providers, offering GMAT, GRE, LSAT, ACT, and SAT courses and tutoring worldwide. We believe test prep should be real education. From our instructors to our materials, we work to teach you the skills you'll need to succeed on the test, in school, and beyond.

I am an ACT and SAT tutor with a score of 35/36 on the ACT and 2400 on the SAT. This is a great supplement to the real ACTs. Manhattan Prep has done a wonderful job replicating the newest version of the ACT. They have paired reading passages and the correct number of science sections (6). The essay questions are also the proper format. Keep in mind that the essay question now asks that address "at least one perspective." Even the Real ACT Book published in 2018 has not made its essay materials reflect this change, but recent test takers have told me that the essay prompt says that you need to only address one of the given perspectives not all of the "given perspectives." The sample essay prompt on the official ACT website fits the format of asking that you address "at least one of the given perspectives." Some test prep materials have not caught up to speed with the recent changes to the test. This is a great resource.

Bought this book to help my 11th grader advisory practice for the ACT. It has some really good practices and breaks down each section of the test into parts so students can focus on their area(s) of weakness. It also provides wonderfully detailed explanations of the answers.

Of course I had to weigh it, and it weighs 5 lbs 12 oz. This book is the size of a telephone directory. I am on my second kid taking these tests, so a fair number of prep books have cycled through our house. This is the physically largest one. Many test books will claim to have 10 or so tests, but only 2 are actually contained in the book and the rest are available online for you to print, with your paper and ink. This book is all print. Chapter 1 is an intro. Chapter 2 is a diagnostic test, so the student can find areas of strength or weakness. This book contains 610 English problems, 500 Math problems, 345 Reading problems and 343 Science problems with answers and EXPLANATIONS. It is that last part that is important because just having the answer is of no help whatsoever if you do not understand why you missed it. We had this issue with prep for my son, although I could figure out the answers for the math and science sections, I often had no idea about the logic behind the answers for punctuation problems. I checked the explanations for the math and science sections (as I can judge these) and found them clear and straightforward. One thing that drives me batty about the ACT is the science section, it really should be called "Can you read and interpret

a table, chart or graph. I really do not feel this measures science but that is not the fault of this book. The explanations given here were also fine. The paper is also nice, some of the books have paper that feels like old newsprint, this is not the quality of a reading book, but is fine for a one time use. The size of the book may be intimidating for students but it is excellent to have it all printed out. It is not exactly portable however, unless you are also weight training. And after you are done, you can use it as a booster seat for small children or short adults.

great for ACT practice, good questions and accurate answers.

My son says it's the most effective prep book he uses.
