Reading Dancing: Bodies And Subjects In Contemporary American Dance

Synopsis

Borrowing from contemporary semiotics and post-structuralist criticism, Foster outlines four models for representation in dance which are illustrated through an analysis of the works of contemporary choreographers and through historical examples beginning with court ballets of the Renaissance.

Customer Reviews

Foster posits the view that dance is a system of meaning that can be interpreted and comprehended if the viewer understands its choreographic conventions. Using the work of four 20th-century choreographers George Balanchine, Martha Graham, Deborah Hay, and Merce Cunningham by way of example, Foster compares and contrasts aesthetics of ideas, historical antecedents and models, and specifics of composition, such as style, movement vocabulary, and means of representation. The philosophical and semiotic writings of Suzanne Langer, Roland Barthes, and Michel Foucault are the bases for some of Foster's analyses. The opening chapter is excellent but as the book progresses, Foster strays from her four examples and her argument loses its clarity. Still, few books attempt to do what this one does. A specialized work recommended for large collections. I return to Foster's descriptions of choreography again and again. No one translates movement into language in quite the same way.

Clear and insightful book that helps explain different trends in modern dance.

The textbook I ordered was in Perfect condition & cheap compared to other sellers. I had the option to expediate shipment and was suprised to receive it within two business days.
