Were you born to be a leader? A healer? An artist or mentor? It can be enlightening to map out your personality by answering a battery of questions, as is shown by the popularity of Myers-Briggs tests and Enneagram books. "Destiny at Your Fingertips is a unique self-help book tailored to the individual reader." --New Age Retailer, Holiday Issue 2008

Ronelle did not expect to become a Life Purpose Fingerprint Analyst. As a skeptic she asks “Why?” about everything and tends to be doubtful. Always curious about what makes people tick, she fell in love early with the characters in fiction and their motivations, then began writing and had poetry published in a national magazine by the age of sixteen. Ronelle went on to earn bachelors degrees in literary studies, creative writing, and “almost psychology” (studying in Communist Hungary seemed more interesting than finishing those last two clinical classes). She went on to complete a master’s degree in creative writing at San Francisco State University. After putting herself through school, the reality of student loan payoff saw her working for an environmental non-profit grant making foundation. A disastrous career change happened four years later when Ronelle quit her next job in crisis within six months with only \$1,000 in the bank and \$30,000 in student loan debt. After desperately selling most of her library and returning to the bookstore with credit slip in hand, she was considering a career as a psychotherapist when a credible book about hand analysis narrowly missed hitting her in the head as it fell off the psychology shelf. Intrigued, she studied the LifePrints system, at Richard Unger’s International Institute of Hand Analysis, while paying the rent with contract work at the upstart artisan chocolate manufacturer, Scharffen Berger Chocolate Maker. Once she had the intrepid business experience gleaned from watching the founders create chocolate on used cranky machines and make payroll with no money in the bank, and her hand analysis certification was complete, she started her own full-time practice in 2000 and never looked back. Since then, Ronelle feels fortunate to have gone places and meet thousands of people she would have never come into contact with otherwise. From exotic dancers to corporate heads, artists, entrepreneurs, and spiritual seekers, Ronelle loves working with people in their common human struggle to find a meaningful life in a bewildering world. In addition to her individual consultation practice, Ronelle is a faculty and Executive Committee member of the International Institute of Hand Analysis and is now a Master Hand Analyst. She also leads life purpose workshops, and trains others in hand analysis. She has traveled the world as a popular conference exhibitor and a dynamic public speaker. In full disclosure, I was a student of Ronelle. I am a professional palmist and Certified Hand Analyst. This book is absolutely wonderful and full of very detailed and deep information regarding your Life Purpose! Whether you’re just merely curious about what your fingerprints might mean or you’re an experienced pro at reading hands and looking for a new resource, I very highly recommend this

book!

As a professional Scientific Hand Analyst, I use Ronelle's book as a reference for nearly every client that I read for! I have found it to be a very accurate and user friendly reference for The Life Purposes, as put forth by Richard Unger's classifications! Of course, I also find it incredibly insightful for my own personal growth and insight into my own hands! It reads like a gentle yet powerful conversation, is well thought out and well organized. Really, this is a fabulous book and I highly recommend it even if you have not yet had your own hands read, as it will provide you with insights into your own soul.

I found Ronelle's book quite by accident...And am glad I did!!'d found just enough information to spike my interest in hand reading and wanted to learn more. Flipping through web pages I found Ronelle's site, read it over, found her book and that's all it took for me to jump in, head first, in this wonderful new world called "me."Her writing is conversational, you feel like she's sitting and reading to/for you. Not some stuffy professor lecturing AT you. Thanks for that Ronelle.The clear illustrations go with the writing complimenting each other nicely. Her short stories explaining points work well and keep it flowing.You'll get a lot out of this if you're interested in learning more about yourself or if you're learning about hand analysis. It's a win, win situation, unique and universal at the same time. You'll learn how to "get over yourself" and "move forward" in the direction that's right for you - it's up to you to take action or not.Thanks Ronelle for opening my eyes to this wonderful world.

If you have had your fingerprints/hand read then you might think this book would offer more insight - it really didn't. In fact, it was really really vague. I got almost nothing out of it.

I just jumped right in this book a little to fast! Got lost, there's lots of info to take in however the book is very useful and I will read it again.

From the very first page this book drew me on and captivated me. I felt I was sitting and chatting with Ronelle about my own hands. Her writing style is warm, friendly, yet gets the point across. I wish I had teachers like her in college - hahaha! Her examples are fabulous and I found them VERY helpful in trying to figure out my OWN fingerprints.Well written, nicely illustrated and just plain fun to read. Add that to the fact that you will absolutely have an eye opening experience about your own life purpose and you have an AMAZING BOOK on hand analysis and determng your unique life

purpose.

This is an awesome book for anyone wanting a new gift. :) Ha! I really used it with another book to cross-reference and learn more about how our fingertips have the blue print. ã Æ Destiny at Your Fingertips: Discover the Inner Purpose of Your Life & What It Takes to Live It

This book has given me so much clarification on my life purpose, not indicating something I'm meant to do and don't want to, but validating the very thing I feel happiest doing and being. And it is nailing all of my friends and family as well - I recommend this book for everyone!
