# Bariatric Surgery: A Guide For Mental Health Professionals

## Synopsis

This book provides mental health professionals with a basic overview of the types of procedures involved in bariatric surgery and the specific psychological impacts such operations can have on their patients. It also serves as a valuable resource to surgeons, nurses, doctors, and support staff who are involved in the medical treatment of obesity, but who may have little background in the psychosocial implications of their work. An accompanying questionnaire is available at <http://www.eatingdisordersarena.com/resources/EDQ.pdf>

## Customer Reviews

James E. Mitchell, M.D., is Professor and Chair of the Department of Neuroscience at the University of North Dakota School of Medicine and Health Sciences. Dr. Mitchell is also President and Scientific Director of the Neuropsychiatric Research Institute in Fargo, North Dakota. Martina de Zwaan, M.D., is in the Department of General Psychiatry, at the Friedrich-Alexander-University Hospital, in Erlangen, Austria.

While it is very detailed book I felt it was lacking in post operative care and case studies. Was very usefull.

very helpful resource for treating bariatric patients with mental health issues. This is an issue that doesn't get enough attention, but is important.
