The Barefoot Investor: The Only Money Guide You'll Ever Need

Synopsis

This is the only money guide you'll ever need. That's a bold claim, given there are already thousands of finance books on the shelves. So what makes this one different? Well, you won't be overwhelmed with a bunch of "tips" or a strict budget (that you won't follow). You'll get a step-by-step formula: open this account, then do this; call this person, and say this; invest money here and not there. All with a glass of wine in your hand. This book will show you how to create an entire financial plan that is so simple you can sketch it on the back of a serviette...and you'll be able to manage your money in 10 minutes a week. You'll also get the skinny on: Saving up a six-figure house deposit in 20 months Doubling your income using the Trapeze Strategy Saving \$78,173 on your mortgage and wiping out seven years of payments Finding a financial advisor who won't rip you off Handing your kids (or grandkids) \$140,000 checks on their 21st birthdays Why you don't need \$1 million to retire...with the Donald Bradman Retirement Strategy Sound too good to be true? It's not. This book is full of stories from everyday Aussies - single people, young families, empty nesters, retirees - who have applied the simple steps in this book and achieved amazing, life-changing results. And you're next.

Customer Reviews

Delivers what is promised. If you think you are rich or poor this book will change your life with three pillars: purpose, family, and finances. It will take less than one year. Read it, and share it, you will not regret it.

Good common sense advice in this book that is relevant to Australian situations. Definitely worth a

read. I learned what some investment terms mean and feel less daunted about taking the big leap into the stock market as a beginner. The pitfalls of ongoing debt, especially that which banks try to encourage you to stay in through things like investment loans and credit cards, was a real revelation. I like the fact that it is independent and tries to empower you to take responsibility first and foremost. After reading this book I began to question the motives of some financial advisors who try to sell you products to their advantage through trailing commissions etc. Educate yourself and be more informed and self-reliant about money first. This book is a good start for beginners and those wanting to get a handle on their money and debt.

An interesting, informative and entertaining book about how to successfully manage money long-term. I wish I'd read it years ago! I've already suggested my sons read it-although, as we live in New Zealand, some of the tips are not necessarily applicable. Will consider joining the Barefoot Blueprint "club" on return from my overseas trip. Thanks Scott!

The Barefoot Investor is a must read for everyone both young and old but especially young people. Scott presents the entire life cycle in easy to follow insights and steps to manage each step financially. I learned a lot and bought copies for my three children to get them the head start to not have to worry about money.

Excellent guide to financial freedom. I would recommend this book to everyone no matter how old they are. It is easy to read and I found myself laughing out loud at times. I would have loved to have read this as a teenager but having read this in my mid fifties, the impact is still significant. I have lost count of the number of people I have recommended it to.

I really enjoyed this book and followed every step I could given what's available here in the US. Though I'm at the start of my journey, I feel the pressure of finance lift off of my shoulders. You will too!

Say no more. I read tonnes of books and rarely leave reviews, but this is too important. If you are in Australia it will be extra helpful. If not, apply the same principles. They will work wherever you are. Congrats Scott.

Scott's simple, logical, no-nonsense advice will change the way you look at money forever, help you

secure your financial future and quite probably save your life - well your quality of life at least. It's also extremely entertaining, and difficult to put down. I'd advise you however to do so at bedtime (or at least move to the couch) if you have a partner, they tend to get upset if you constantly laugh outloud while they're trying to sleep.
