I believe the main reason in the advancement of technology and the birth of social media (instant communication) is to increase the connection that we as humans deeply desire. Without a doubt friendships, love, family, acceptance and communication is what spurns us forward; but are we genuinely connecting? Are we really being the friends, best friends we claim to be? Are we having Those soul filling relationships we desire or are we just saying we do?-It's weird how we wish to be so close but we're everything but that. This book "How to be a best friend forever" encourages the importance of a best friend, a true best friend. Not someone we just give a title to, but someone who in fact lives and acts out what a best friend really is.-In a society where we are consumed with living, and where loyalty is becoming rare, deep connecting friendships that provide us with happiness, guidance, and acceptance is not only crucial but in fact mandatory. We as humans have this belief that we can do it all alone, but having true friends, can do wonders for us.-True Friendships enhance the quality of our life and relationships. They contain different strengths that bring out different qualities as well as being that therapist, teacher, nurse etc.-This read not only outlines the

importance of a great friendship, but provides insight on how to tell whether or not the relationship is true and real. The author also provides ideologies on how to build and maintain a bond through methods of connecting and attachment.-This will help you to review the relationships you have already, to help you understand if you're maximizing its potential.

What a wealth of information from Dr. John Townsend concerning friendships! His extensive research with numerous examples of different types of friendship and family relationships are so helpful for healthy living or as Christ says in John 10:10 "Abundant Life".

Came on time and in great condition. I was really happy with this book. It has helped me to see the things I need to change to restore a friendship of twenty-some years. We had some disagreements and hurt feelings, and, of course, I felt I was more right than she, but in the end is it better to be right or have a friend? I found some great information in here that will help.

I liked how it was broken down and explained with real life examples. I chose it based on the book "Safe People" and would recommend both books to friends.

Disappointed. Very sketchy. Almost like the author just wanted to churn out another book. No depth on concepts. Was expecting more from Dr. Townsend. Maybe not his area of expertise.

This is another great self help book by DR Townsend. I have read many of his books and this one is as good as the rest.

It took me a while to get into this book, mostly because I didn't want to acknowledge the lessons. The biggest lesson I have learnt through reading this book is that I do not really have the "tools" or "experience" in being a best friend. But I now understand the importance of having a best friend in my life: "Having deeply accepting friends helps us beyond the fact of being accepted by others, and then by ourselves. When our deepest relationships know us and accept us anyway, we are now free to deal with our weaknesses as a problem, rather than a condemnation." This is what has happened to me. I was accepted for who I was and then was able to finally look at my own acceptance as something easily achieved.

Purchased this book as a gift.Very informative and easy reading.Extremely pleased with this purchase.Highly recommend to others.
