Basher Basics: Space Exploration

Synopsis

Basher Basics: Space Exploration, Created & illustrated by Simon Basher From Basher, the illustrator who showed the periodic table in a whole new light and gave us his fresh spin on physics, astronomy, planet Earth, chemistry and more, comes a book that shines its light into out-of-this-world beings who make the universe tick. Learn about the amazing research that is revolutionizing space exploration, from the pioneering space crafts and equipment known as 'Space Aces' that have been used to delve into deep-space exploration to the scientists known as 'The Outerplanetary Mob' that have not only taken voyages to space and back but have contributed to our understanding of the universe. Space Exploration is a compelling guide to developments at the very forefront of science - a must-read for anyone wishing to understand, and engage with, modern space.

Book Information

Series: Basher Basics

Paperback: 64 pages

Publisher: Kingfisher (October 15, 2013)

Language: English

ISBN-10: 0753471655

ISBN-13: 978-0753471654

Product Dimensions: 6.9 x 0.3 x 0.3 inches

Shipping Weight: 5.6 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 19 customer reviews

Best Sellers Rank: #203,611 in Books (See Top 100 in Books) #94 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Aeronautics & Space](#) #136 in [Books > Children's Books > Education & Reference > Science Studies > Astronomy & Space > Astronomy](#) #3139 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Gr 3-7 • A breezy tone and ultra-cute illustrations enliven this introduction to space-exploration missions. Two-page spreads per topic, with one page devoted to a brightly colored illustration, provide bite-size chunks of information in a cheeky, first-person voice. Four chapters cover miscellaneous space exploration objects and concepts ("Space Aces"), spacecraft

that explore the inner planets ("Sunshine Superstars"), outer planets ("Outer Planetary Mob"), and beyond our solar system ("To Infinity and Beyond"). The lighthearted tone never wavers, even when discussing sad topics, such as the one-way spaceflight of Laika the cosmonaut dog. Round-faced, pink-cheeked line drawings anthropomorphize each topic, from orbit to space tourist to the Mars rover Curiosity. While students will need titles with greater depth and more technical illustrations, such as Carole Stott's *Space Exploration* (DK, 2009), for reports, this book's charm lies in its upbeat, goofy approach. — Sarah Stone, San Francisco Public Library --This text refers to an out of print or unavailable edition of this title.

“A breezy tone and ultra-cute illustrations enliven this introduction to space-exploration missions. Two-page spreads per topic, with one page devoted to a brightly colored illustration, provide bite-size chunks of information in a cheeky, first-person voice. . . . this book's charm lies in its upbeat, goofy approach.” — School Library Journal

My son is a huge fan of these books. They teach a lot about their topics in a funny way for kids to understand. They come with a poster for their wall and have so many fun details.

My daughter loves her Basher books! She is 8 and these are great books for her. She loves to read new things and these are priced so that we can continue to get her new ones and her that for knowledge is continually being feed.

My grandson, age 10, loves the Basher series is books and soaks up all the information from them with great interest... He even reads them in bed every night before going to sleep...

These books are so fun. My 8 and 10 year olds love them. We have the Space Exploration, Technology and Biology ones and I will definitely be adding to the library since both of my boys have actually read them- a miracle!

Love Basher books! My son spends hours reading these books, and he's so inspired by the illustrations that he often creates the drawings into little clay figures. These books are wonderful!!!

My son loves these books!

I can't say enough how great all of the Basher books are for getting kids interested in and explaining to them all the cool topics they cover. If you haven't gotten any of these books for you children, you really must.

My son was very excited to get this at Christmas. He enjoys this whole series and learns soooo much from each one. Makes great gift from parent to child or for grandparents to give grandkids age 9-12.
