## Synopsis

Natasha I'm a girl who believes in science and facts. Not fate. Not destiny. Or dreams that will never come true. I'm definitely not the kind of girl who meets a cute boy on a crowded New York City street and falls in love with him. Not when my family is 12 hours away from being deported to Jamaica. Falling in love with him won't be my story. Daniel I've always been the good son, the good student, living up to my parents' high expectations. Never the poet. Or the dreamer. But when I see her, I forget about all that. Something about Natasha makes me think that fate has something much more extraordinary in store - for both of us. The Universe Every moment in our lives has brought us to this single moment. A million futures lie before us. Which one will come true?

## Book Information

Audible Audio Edition

Listening Length: 8 hours 4 minutes

Program Type: Audiobook

Version: Unabridged

ASIN: B01K5VQF0W

Best Sellers Rank: #17 in Books > Teens > Literature & Fiction > Social & Family Issues > New Experiences #28 in Books > Teens > Literature & Fiction > Social & Family Issues > Emotions & Feelings #97 in Books > Teens > Romance > Contemporary

## Customer Reviews

Nicola Yoon is receiving rave reviews for her second novel, *The Sun Is Also a Star*. While I liked it, I am still firmly picking *Everything Everything* as my favorite novel by this author. This novel moves between two narrators: Daniel and Natasha. Daniel is a Korean immigrant who is struggling with his parents' expectations that he go to Yale and become a doctor. Natasha and her family are illegals being deported to Jamaica immediately unless they can find some last minute assistance to allow them to remain in the United States. These two teenagers meet and have only a day together, yet both fall in love. I wanted Natasha and Daniel to have a happily ever after, for Daniel to be able to forge his own path, for Natasha's family to be allowed to remain in the United States. This book was a very quick read, but in some ways I feel like the short chapters and speed of the story prevented

me from being totally invested in Natasha and Daniel. Yoon's ending is also a bit unbelievable, which may bother some readers, but which I enjoyed a lot. This is a good second novel from a talented author. I had such high expectations after *Everything Everything*, I'm not sure anything could live up to that for me.

This book felt like a YA version of *November 9* to me. Where he only has a day to make her fall for him. In Colleen Hoover's *November 9*, the story is more widespread. I enjoyed that book more, but this I felt covered more important topics that should be touched on in the literature world. See below. Still, I love the story line, the back and forth between the characters, the vast difference between them, but also the similarities. Natasha and Daniel are two completely different people from two different races. By a chance meeting, then another, the insta-love begins. They decide to put the idea of love to a scientific test to see if he can make her fall for him in the only day they have. Coincidences continue to line up, and Natasha refuses to believe in "fate" or a "higher power" or that "everything happens for a reason". But when push comes to shove, when is enough, enough? Daniel opens her eyes to thoughts she would normally shrug off, to considering beliefs she would typically scoff at. NOTE: This book discusses topics like history & science, race, faith, loneliness, suicide... So while the insta-love factor is there, it wasn't making me run away from the story like they usually do. *The Sun is Also a Star* is a beautiful tale of two people pushing the boundaries, not just of race, but of beliefs. That two people with open minds can still love each other completely because of those differences.

i enjoyed the way its written...she actually spends time giving details about the different side characters like backgrounds or future info which i really really enjoyed...honestly i would have given this book 4 stars if not for all the religious profanity...its unneeded and offensive...i read this for a book club, normally would have put it down after seeing that stuff...but like i said the story is fun, the characters interesting, and the writing style different...much better story than her other novel "*Everything Everything*" (also read for book club) so if the profanity isn't a big deal to you i would recommend it...

Do you believe in love at first sight? Do things in the universe align in a specific way? How does one's decision today impact the decision that someone else may make based on your actions? A powerful story of destiny and love at first sight. The characters are well developed and it eloquently addresses the concepts of expectations and bias. Daniel struggles between doing what

he wants and what is expected. Clearly a likable character that struggles to migrate from his Korean culture to his new American desires. Natasha, an illegal immigrant, is a feisty, level headed girl who believes in the power of logic not destiny. The author expertly intertwines various stories throughout expertly connecting them through fate. A light story that looks at some serious topics in a meaningful way.

i love this book with all of my heart!!!!the story!!!!i absolutely love Nicola's writing.i definitely recommend her first book as well; Everything Everything.i got it the day of release (makes shopping so much easier through !) and the packaging was great. no damage what so ever.

Recently read Everything, Everything and knew that I wanted to read everything by Nicola Yoon.This book deals with so many themes: cultural identity, race, family, immigration, religion, etc. The book takes place over about 14 hours and the two characters meet and fall in love in that time. I think some reviewers will dislike the "insta-love" aspect of this book, but them falling in love so quickly is the entire point of the story. Can two people be meant to be? Is there such a thing as fate (as opposed to just a bunch of coincidences that lead to a particular outcome)? Natasha doesn't believe in fate. Daniel does, and he's willing to pursue her until she believes it too. One of my favorite parts of the book is when Yoon talks about "multiverses" and how there might be a universe that exists for every possible outcome. And so when Daniel and Natasha meet there are couple of moments when they think they're having deja vu, as if those universes are colliding together.I also love that Yoon is always so creative with her narrative style and pulls us into the stories of secondary and minor characters in addition to the two leads.And yay, representation for all the interracial couples out there that don't often get their stories told!
