Breast cancer is different for each person. Most people don't realize that fact. They think the severity of Breast cancer is based on how long you went undiagnosed. While that is true, the type of breast cancer a person has is significant. If you have been diagnosed with Triple Negative Breast Cancer this is the book for you.

Everything was as promised!

Covers a lot of ground and my aunt was so appreciative! Many things the doctors just touched on and many she didn't know to ask. A good reference when her mind starts to race. Thank you!

This book has been essential for my family understanding what is happening to our mother and what questions we should ask her doctor. She was overwhelmed with pamphlets and the like and this book simplified it immensely.

Good

if you are a survivor or you were just diagnosed it provides great info. There is not a lot of info in the media for triple negative breast cancer

Glad I got the book, it had useful information and questions I could ask my Oncologist.

The good information given in this book should be given in doctor's office. I know they don't have the time to cover everything.
