My research relied heavily on The Demonologist. It scared the daylights out of me. Profoundly.

I watch/read a lot of scary stories. But, The Demonologist, true life account of Ed & Lorraine Warren, is the scariest book I've read. --James Wan, Director of 'The Conjuring' and 'The Conjuring 2: The Enfield Poltergeist'

This is a great book! Not only does it give us more insight in some of the cases they've been a part of, but it gives us sage advice we all need to keep ourselves and those around us safe from the

negative entities that surround us all every day. They also prove the importance of having and using a positive mind and spirit in our every day life. They lived that way and survived many unbelievably evil entities. I'll take their word for it.

I've always been interested in the occult and *The Amityville Horror* was one of the first scary books I'd ever read. So, what better than to read about the occult from the very people that studied Amityville? The book is definitely interesting, but it's kind of a boring read. You would think, with all the research they've done that this book would be a real page turner but, alas no. I still enjoyed it, it just took me awhile to get through.

This book takes a clear eyed and calm look at the strange career of the Wardens and what information they have found to be true about the spirit world. Almost clinical in discussion and with documentation to back up their experiences, you will want to learn more about the Warrens and their dedication to educating about the public about demons, devils, and ghosts.

Currently, I'm doing research on modern paranormal research and where current society places this interest. With all the developing reality TV shows like *Ghost Hunters*, *Ghost Adventures*, *Celebrity Ghost Stories* and *Paranormal State*, the interest in what happens in the after life is becoming more and more obvious. How does a society where information is instant and science/technology begins to overshadow our spiritual/religious thinking, incorporate the inevitable end and what lies there after? Regardless if you are deeply religious, atheist, or constantly wavering between both extremes, death is what each human being will experience. This is a great read on where two individuals have documented their own experiences as factual as they are able to describe leaving plenty of room for firm believers and skeptics.

This book held my interest quite well, and was interesting. One definitely needs to have an interest or at least a curiosity in the subject matter. The experiences of this husband and wife team are quite extraordinary. I'm not certain that I would have the intestinal fortitude to get involved in what they did as a life's calling. I remember as a youngster in parochial school a Nun warning the class to never "play" with a Ouija board. I took that warning to heart and never did, but have known people who did and they brought misfortune upon themselves or at least it certainly appeared that way. In many of the Warren's cases the Ouija board seemed to open a portal to misfortune and / or possession. Generally, a very interesting book.

I enjoyed reading the book even though some of the information was a little difficult to swallow. It was well written and easy to read.

One of the best books I've ever read. I first saw *The Conjuring* which made me want to read up on more cases regarding the Warrens. This is a page-turner to say the least. On one hand, I never wanted to put the book down it is so fascinating. On the other hand, being a religious man, I believe there are things that still happen like this today apart from the stories that are fake or blown out of proportion, and there are some genuinely creepy things in this book that gave me chills for quite some time where I had to put the book down just to get back to normalcy. Reading this at night in the privacy of my own home while everyone else is asleep will definitely get to you. To see pictures of things levitating is surreal. This has given me a yearning to read more books on exorcisms and the like.

As a young boy I lived in a home that been haunted and all family members to this day will tell you that the home was indeed haunted. When I got older I started reading books that dealt with the subject of hauntings to gain an understanding of what had happened in that house which brings me to the book *The Demonologist*. This book is by far the most informative on the subject, bar none. It gave me an understanding of both ghost and inhuman spirit phenomena and how to avoid such things from ever happening again. It covered the laws of attraction and invitation as well as what a Ouija board really is and the pitfalls of using any such device for communicating with the spirits. Stay in Gods good graces and read the Bible. Remember, knowledge is power. God bless.
