# The Earthwise Herbal Repertory: The Definitive Practitioner's Guide

## Synopsis

Internationally known herbalist Matthew Wood takes the guesswork out of the application of medicinal plants and provides an invaluable cross-reference of constitutional types, energetic categories, and specific symptoms that helps the herbalist narrow down the number of possible remedies for a specific condition. Unlike many reference books in which medicinal plants are defined simply by condition or disease name, this book contains tools to differentiate between remedies and analyze each case in a holistic fashion. While this system of cross-referencing is well known to homeopaths, it is less frequently used by herbalists; The Earthwise Herbal Repertory seeks to bridge the gap between different systems, incorporating knowledge from ancient Greek and traditional Native American medicine, nineteenth-century botanical medicine, homeopathy, and modern biomedical research. This definitive repertory proves useful for homeopaths and herbalists, professionals and home practitioners alike.

## Customer Reviews

"The Earthwise Herbal Repertory is an incredibly impressive achievement. While homeopathic repertories are legion, in modern herbal literature we have a very limited collection of works; this is an important and much-needed addition to the published sources of herbal specifics. It will help Western herbalists better understand their materia medica and achieve superior results with their clients. It also helps lay a foundation for the further development of herbal medicineâ€”one rooted in the past, but continuing to grow and look to the future."â€”David Winston, registered herbalist (AHG), president of Herbalists & Alchemists

â€”Matthew Wood's style of herbalism is deeply important

to the modern world. He reminds us of the deeper intricate and energetic workings of plants. If I want to truly get to the heart of a plant, I read up on what he has to say. Jonathan Keyes, acupuncturist, author of Guide to Natural Health "Matthew Wood's writing leaves me simultaneously pondering, blown away, inspired, and a bit giddy. Few people have the ability to pull in and weave together as many different strands of herbalism into such a beautiful tapestry. I'm deeply grateful to live in a world with his perspective." Jim McDonald, herbalist at herbcraft.org

Matthew Wood has been a practicing herbalist for over thirty-five years and is an internationally known teacher on the subject. Wood has an MS degree from the Scottish School of Herbal Medicine (accredited by the University of Wales) and is a registered herbalist in the American Herbalist Guild. He is the author of eight books on herbal medicine, including The Book of Herbal Wisdom, The Practice of Traditional Western Herbalism, and The Earthwise Herbal. For more information, please visit [matthewwoodherbs.com](http://matthewwoodherbs.com). David Ryan C Ac, C Hom, CMT is a Northern California healer, teacher, and practitioner of Tai Ji and Qi Gong. He is currently working on a book on the Gurdjieff meditations and Qi Gong for the five elements and seven centers, In Search of the True Self.

Awesome book... very concise and to the point... easy to use guide for the everyday herbalist!

Very technical...all the Latin terms are listed..a great book for more advanced herbologists

This gem of a book arrived yesterday and I spent hours reading it last night. The brief review of tissue states with lists of herbs to consider for each was a great addition to this book. (For more in-depth info on tissue states see Matthew Wood's book "The Practice of Traditional Western Herbalism"). There was also a review on tongue conditions with a diagram of a tongue and organ system areas identified, as well as plants listed for each tongue body and coating picture. It was such a nice review, quick and easy to read and reference too. The indexing and table of contents work very well - these are the first places I look in a book, to gauge how easy the book will be to use. The List of Herbs was very helpful in looking up the latin names of unfamiliar herbs to find the common name. I wish every herb book had a list like this! Of course the best part is the listing of herbs by organ system with a few extra words about each. Its so quick and easy to use and has already proven a great reference in a few areas I was looking for other plants to try.

Great multi-use book. I have used it several times for my Herbalism and my hubster has used it as a reference for his homemade bitters.

This is an excellent book for anyone interested in advanced herbal medicine, homeopathy, and natural medicine. It is crammed full of useful information. It is definitely a book that should be on the shelf of every herbalist.

began with hwrbal apothocary by another, which excluded info on some of the listed herbs. not wishing to follow blindly, got this and two mentioned. here one is in tall cotton.

great book. great Herbalist and healer

A MUST-HAVE book for anyone interested in medicinal plants. I've learned more from Mr. Woods' books than anywhere else. It helped take my skills to the next level
