Age Range: 1 - 4 years

Grade Level: Preschool and up

## Customer Reviews

We own all of these books and love working on fluency with our bilingual kiddo. Some of the signs are initialized (sadly), regional or antiquated. I want able to find out what the source is for the signs, whether a specific Deaf community member, a certain dictionary, or something else. I wish it was listed somewhere on the back cover.

great idea for teaching children sign language. I don't know what age it is appropriate for. My grandson is 3 and has a hard time keeping attention to the book. Maybe when he is older it will be a better tool.

love the dough teaching my granddaughter sign language as a second language is the best in the book really does well on teaching great job you still great job with this book would buy it again and would by others that you have for sign language, S.I.N.Y.LADYRIDER

This book is awesome! My two year old is hearing impaired and I ordered most of the books in this series. I am impressed with the the way the author and illustrators have put this book together. It is the easiest book I have found to teach not only myself and my daughter sign, but also for my other school aged children to learn as well. I highly recommend this book for anyone who wishes to learn sign.

Bought for daughter, cute book.

The written explanation of how to do the signs aren't as descriptive as I would like in all cases but this is an adorable book. Bright and colorful. Good board-book quality. My 19 month old son likes it. I will buy more from their collection.

This was a gift for our granddaughter who just turned 1 and her Mommy and Daddy had already begun teaching her some signing.

I have several books in this series. We love the artwork, clarity of images/instructions and variety of useful signs. Just wish there was a table of contents or index for easy reference, but the books are short enough that it's not a major hindrance.
