Video Atlas Of Oculofacial Plastic And Reconstructive Surgery, 2e

Synopsis

Ideal for oculofacial, facial/cosmetic plastic, and dermatologic surgeons, the updated Video Atlas of Oculofacial Plastic and Reconstructive Surgery brings together high-definition quality video and accompanying color atlas to help you master the latest reconstructive and cosmetic surgical procedures of the eyelid, lacrimal system, orbit, and face. Superb illustrations combined with expanded coverage of over 70 techniques deliver a complete multimedia resource to help perfect your surgical skills. Professionally edited high-definition video clips with author narration, labels, freeze frames, and digital overlays explain the key steps of each technique. Includes high-resolution screen grabs throughout the text to pinpoint key stages of the procedures.

Customer Reviews

"I would take it a step further and say that it might be as good or even better than being there in the OR, watching the surgeon perform each procedure. Why? Because the videos are well edited, the view and the lighting are excellent, the procedures are accelerated through the repetitive steps such as suturing and cauterizing, the important points are highlighted, and the voice-over is clear, unhurried and undistracted by the actual operation." Reviewed by European Society of Cataract and Refractive Surgeons (www.eurotimes.com), Sep 2016

Excellent Book

I used the first edition as a resident and now that I am out in practice, I bought the newer edition. What an improvement - it now comes with online access to the text and videos on an app that can be used on my iPhone. I leave the book at the office and can pull up any chapter or video on my phone before cases. They also improved the videos and things are labeled more clearly with arrows and diagrams. I also occasionally have medical students rotate with me, and it is nice to have these high quality videos that I can show them before we do the surgery. You can probably find similar videos on youtube but I have found that the quality of the videos with the narration have been the most helpful. If you are an ophthalmology trainee, oculoplastic fellow or someone in private practice like me who does oculoplastics, this is the best resource you can get. I see that the first edition is much cheaper than the new edition, but I would buy this one because the app has been so convenient and the videos are much improved.
