Fundamentals Of Special Radiographic Procedures, 5e (Snopek, Fundamentals Of Special Radiographic Procedures)

Synopsis

Presenting the information a technologist needs to know to perform advanced diagnostic and interventional special procedures, this text provides complete coverage of topics such as angiography, cardiac catheterization, and vascular interventions. A general overview includes room design, image recording systems, injection devices, contrast media, and catheters. Coverage of specific imaging procedures includes anatomy, indications and contraindications, procedures, contrast media, patient care, equipment, and patient positioning. Discussions of cardiac and vascular interventional procedures help practicing radiographers prepare for the ARRT advanced certification exams. Special tables for equipment tray setup list the items needed for each procedure. Chapter summaries recap the most important information and provide a quick review. Key terms are bolded throughout chapters. Special boxes draw attention to important information in the chapter. List of pharmaceutical resources is included in new appendix. End-of-chapter questions include 10 multiple-choice questions for self-assessment. Chapter objectives focus on the most important information to be learned. Updated art program includes new line drawings, diagnostic images, and equipment photographs. New content includes: Positron emission tomography MR angiography Peripheral angiography and venography Left heart cardiac catheterization Monitoring procedures and equipment during cardiac catheterization Extensive additions to the vascular procedures sections, including: Revascularization Thrombolytic therapy Ablation Embolization Transcatheter biopsy Transjugular intrahepatic portosystemic shunts Inferior vena cava filters Information about HIPAA

Book Information

Series: Snopek, Fundamentals of Special Radiographic Procedures

Paperback: 480 pages

Publisher: Saunders; 5 edition (April 12, 2006)

Language: English

ISBN-10: 0721606326

ISBN-13: 978-0721606323

Customer Reviews

Albert M. Snopek, BS, RT(R)(CV)(M)(QM), Chairman and Assistant Professor, Radiography Education Department, Middlesex County College, Edison, NJ

We had multiple rotations while in school. A lot of the time there was little to know warning what all went on in each modality. "Oh my goodness! I'm so nervous. What do they even DO in the Cath Lab?????" Comments like that will be eased with this book. There are short concise overviews of things that go on in special modalities. Very helpful.

My book came completely deteriorated. In at least three sections falling apart.

Great

For anyone who is a student of a radiography program and looking to specialize this is a great book. Very detailed and gives you many options for your future!

it gives a great insight on what you need to know as a special procedure tech. it's not confusing and easy to understand

It's probably more the subject matter than anything else that makes this books simply okay and not a real page turner.

NICE BOOK

Exactly what I needed! In great shape!
