The best I can say is that the plot had potential but it quickly became a piece of crappola. Gratuitous PC Ideas thrown in here and there that does nothing to further the plot. Vegan ideology, cows causing pollution, an AI Eco Terrorist wanting to wipe out humanity (gaiaism), socialism, let's all sing Kumbaya etc. I was thinking the only thing missing was Homosexuality but not to be disappointed it showed up. I found myself skimming through the book(s) only to find that there are three more books in this disaster.

I purchased this trilogy not knowing what to expect. It is part fantasy and part science fiction. Many simultaneous plots are well done and kept me interested. Hard to put down. After reading the first 3 books, I purchased the 4th in the Series. Then got an email saying I could purchase the second trilogy for 99 cents. Jumped on that offer and am now reading the 7th in the series. Characters are well developed and make you feel them. The only criticism are the fight scenes between Chase and other Furies. A little drawn out and over the top.

Veru good read

Great read!

I really tried to read this book. I had a 3.5hr plane flight that I down loaded this for. This book's writing is so simplistic that I felt it was written by a high schooler. and the borrowed tropes. My god they were so blatant. Bad guy looks like demon. Bad guys behind the previous bad guy look like lizards. Good guys are Greek in origin but after only 2000 years have forgotten about Earth. Protagonist is half human half "fury". I made it through 20% but can't stomach anymore.

The plot of this series is really ridiculous, but that doesn't mean this fast moving space opera isn't a heck of a lot of fun to read. You'll laugh, root for the protagonists and boo-hiss the villains and

wonder what the next deus ex machina will be to get the heroes out of a continuous series of seemingly impossible situations. From quadranium (a mineral in short supply that runs things), to F-14 Tomcat fighters updated for space battle to our fair haired Star Alliance fighter jock who falls for a hot female red haired earth fighter pilot, and a lot more.....have fun!

As an avid reader, I am always disappointed when a publisher releases a book for sale that is written as poorly as this trilogy. These books read like they were written by a middle school student. Aside from the childish writing, the author spends pages on absurd "love, love, love" kumbaya scenes that leave you wondering if the appearances of "Aphroditis" in a space war saga is about to be followed by the entry of a certain highly despised purple dinosaur giving group hugs and singing nursery songs. If all that was not enough, the author has to hate on people who eat meat and absurdly proclaims that cows are responsible for half of the planet's pollution. Overall, this series is clearly a product of modern public school education, heavy on indoctrination and feather light on redeeming value. If you value good writing, original thought, and a good space war without weak minded political preaching, I suggest you look elsewhere. Getting through this trilogy was painful.

When you first start this book you'll think it was written by a 13-year-old. But you'll soon become caught up in it. Then you might get a bit exasperated with the heavy-handed vegetarian and environmental sermons masquerading as plot items. Then, once you get past THAT, you might enjoy the books some more. Its a 50/50 whether you'll like it to be honest.
