Math

## Customer Reviews

This is a great book if you start working on Facebook marketing. Basically saying, this is a good instructional book on how to use facebook effectively for marketing or other business purposes. Social media is considered as the cheapest way to introduce products to a customer worldwide. This book shares different methods of using these social media platforms and also guides about taking care of your loyal customer's step by step. This is a great book if you start working on Facebook marketing.

Being a Self Publisher it is very important to reach as many people as you can. It sounds easy but is a whole lot difficult. Facebook gives you more than 1 billion daily active users and if you can reach them, you will be at the paramount of your business and this book makes it happen...

The book gives you good insights on how facebook marketing works, the tips and tricks shared by the author are very straight forward and explained really well. This book is perfect for newbies at facebook marketing.

Informative and helpful. Specific tips and reasons why you will benefit from the advice. The low cost proposal is worth trying.

1. Pamela Russell will teach us how to get 1 million likes on Facebook in 6 months? Lets see, how many likes does she have on Facebook? For God's sake, I can't even find her Facebook fanpage.2. In chapter 4, she talks about bots..."The key part of your page growth is commenting and liking on every post coming from similar pages and similar hashtags. Searching and posting 500 comments a day-beleive me-requires a lot of time! To speed up the process, Facebook bots have been developed to automatically do this for you. For a very small investent sum bots can search pages, search hashtags, post coments and like on your behalf. and example of a bot with this capability is followliker,...."Really? followliker, is a Twitter marketing bot, and not Facebook marketing bot.If anyone thinks I am wrong, please comment and correct me....She goes on .... "but there are many (bots) out there."Which ones do you have in mind sweetheart?She continues.... Make sure you do search into all available (search into? or look into? sounds like a rip off with article rewrite) bots, learn their capabilities and finally choose the one best suited to your social media

requirement. Really? You can't even name the bots? Even the one you mention, is not even a Facebook bot!!!! If I have to do all the research, why do I need your book? Total waste of money and time. It's like reading an essay written by a high schooler who rips off a bunch of info from here and there and rewrites it in their own words. I challenge that the author has no actual experience in the field. Although, the book has some useful info, it can be found all over the internet. You can get far more info from emails you receive when you subscribe to email, of someone like Neil Patel for example (no, I am no way related to Neil) or Gary Vaynerchuk, etc

Marketing a product is not that simple; it needs effective strategy. It said that based on a study, Facebook is a better source, not saying I should ignore others, but my attention should mostly focus on Facebook for marketing purposes. I recommend this book to those who want to start doing a marketing advertisement through Facebook.

Great practical information in here on how to do some great Facebook marketing including strategies to get to 1 million page likes! I know that is a bit of a goal, but this read will tell you how to get there step by step, among other marketing strategies, such as shoutout 2 shoutout.

I didn't like this book for several reasons. 1) It makes BIG promises that most people can't achieve 2) It has EXTENSIVE spelling and grammatical errors 3) This book alone probably won't provide enough information to make you successful
