Stephen Stoker of Weber State University in Ogden, UT, has taught the gamut of introductory

chemistry courses, specializing in GOB, for the past 30 years. Weber State has a very large Health Professions school, and GOB is geared at students with little or no experience in chemistry (notably Allied Health and Nursing majors).

I ordered the book on dec 16 and it didnt come until this past weekend. i ordered two study guides and those came by the first week in jan but i ordered those in late dec. I called b.c i needed the text book for school and they gave me the run around. i was told the book was sent out in dec 20's but i called back and got a different consultant and they told me the book hadnt even been sent out. UGH. So stressful I'll order again but next time Im just going to order it WAY EARLY. but other than that. the book was great it was used but nothing was written in it and it was in very good shape.

Perfect condition!

Ok

It helped me pass

I appreciated the Thank You letter for my purchase and the book was in very good shape. I am glad because I tend to rough up my books alot from using them so much :D. The shipment came as I expected!

The book was in good shape and came within two weeks of ordering it. I saved a lot of money by getting this book. I'm glad I bought it!

i still have not gotten my book and i have gotten my other two already that i ordered at the same time and it's been over a month ago and it still has not even been shipped.

the book was in great shape; almost brand new. I would certainly buy from here again.
