This purchase was to replace my original copy that had been sadly lost during a move! I had no idea that the book had been updated with modernized drawings. I was given the original copy by my shamen during a long period of time that I was out of balance with myself and my surroundings, reading it showed me the path to restore health and serenity to my journey through life. I used it as a reference book to maintaining good spiritual balance, and to help others do the same!The lose of my original copy was tramatic to myself and those who had become accostomed to referencing it's pages. I recently came into some unexpected income and was finally able to replace my beloved Medicine wheel earth astrology book.This is not a book of horoscopes it explains the relativity of nature's influences on us in regard to our birth. It also aides in choosing items for one's own medicine bags, and natural health! I am again peacefully at balance!!

This book is so informative. It combines spirit animal, spirit mineral, color, plant, spiritkeeper, spirit clan, and the medicine wheel. I read this to most all of my family and friends, to inform them on their specific earth astrology and medicine wheel spiritual characteristics.

Another angle at Sun Astrology with the Moon instead. It would add to your astrology with a Native American taste. A good read to expand your base knowledge with a good explanation of their way of looking in this direction.

This was a quick and fun read. I love traditional astrology and this provided a different type of look at what traits people born during a certain of a year happen to have. I love the way each grouping of people starts off with an animal and the details provided ring true for me and many of my friends. This was a quick and fun read, with interesting information, if you like astrology and personality typing through astrology.

I bought the first publication of this book in 1982. It is right on as far as I'm concerned. I bought myself a new book, plus bought other books for friends. This book is very interesting. One can better understand other people, and one's self, by looking up their astrological sign. Sun Bear uses Earth references as guides in revealing the characteristics of each sign. He claims this book was given to him by Spiritual sources.

Very enjoyable piece of work. I didn't get to hold on to it very long my daughter took it so I'm going to have to purchase another

Mind-opening look at Earth Astrology with lots of helpful insights. Read this book years ago and was having a hard time finding it again. I am so very happy it was rereleased. Everyone should read this book to help them reconnect with Mother Earth.

Very detailed explanations for each sign. Fun reading.
