LooseLeaf For Medical Ethics: Accounts Of Ground-Breaking Cases (Philosophy & Religion)

Synopsis

Medical Ethics: Accounts of Groundbreaking Cases provides an in-depth study of Bioethics authored by a pioneer in the field. This program covers some of the most well-known bioethics cases and the ethical issues those cases present. It also gives an overview of current issues in the medical ethics field. The thought-provoking content affords students the opportunity to think beyond what is presented in the book, enabling them to actively assess what they have read. The Connect course for this offering includes SmartBook, an adaptive reading and study experience which guides students to master, recall, and apply key concepts while providing automatically-graded assessments. McGraw-Hill Connect[®] is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook[®] - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping.

Complete system requirements to use Connect can be found here:

Customer Reviews

Gregory Pence is one of the pioneering bioethicists of America. Having taught for thirty years in a medical school, he has seen many past prophecies of doom fail. He is optimistic about biotechnology. He is internationally famous for defending cloning and genetically modified food against bioLuddites who oppose research on stem cells and cloning. Because of his views, his talks have been picketed by Greenpeace and anti-cloning zealots. His *Classic Cases in Medical Ethics: Accounts of the Cases that Shaped Medical Ethics*, 4th ed., 2003, is one of the standard textbooks of bioethics. His *Who's Afraid of Human Cloning?* (1998) is already regarded as a classic in bioethics for its rigorous attack on opponents of cloning. His *Cloning After Dolly: Who's STILL Afraid of Human Cloning?* will appear in late 2004. His *Designer Food: Mutant Harvest or Breadbasket of the World?* won a Choice Outstanding Academic Title in 2003. He doesn't think the sky will fall if a cloned baby is born. In opposing laws against cloning, he was asked to testify in 2001 before Congress and in 2002 before the California Senate. Constantly in demand for national television, Pence has been interviewed on Bobby Battista's "Talk Back Live" with Bobby Battista, "The Point" with Gretta von Susteren on CNN, "The Early Show with Bryant Gumbel" on CBS, "Wolf Blitzer's Washington" on CNN, as well as on National Public Radio's "Marketplace" and its "Weekend Edition." He has also been interviewed by TIME magazine, the New York Times, and most national publications. He has published in Newsweek, the New York Times, and the Wall Street Journal. Pence has given the Soundings Lecture at Castleton State College, VT, the Thornton Lecture at Alma College, MI, the Seidman Trust Lecture at Rhodes College, TN, and the Hughes Memorial Lecture at West Liberty State College in WVA. He has talked at Princeton, Yale, and Stanford. He has given keynote talks about cloning at universities in Portugal, London, Switzerland, and Australia. Pence teaches at the medical school at the University of Alabama in Birmingham (UAB), where he also directs a program for gifted undergraduates pre-admitted to UAB medical school. There, he has been voted Best Teacher. He grew up in Washington, D.C., was graduated from the College of William and Mary cum laude in Philosophy, and earned his doctorate from New York University in 1974, where he worked on his dissertation under bioethicist Peter Singer, now at Princeton University.

Got me through my class, also an interesting read!
