## Customer Reviews

"With smells, robots and messy paint, what's not to love?" --Kirkus Review "As Scott and I read these books through together for the first time we were both in a fit of giggles. At the end of almost every page Scott asked to read the whole book again when we were finished with it." - becausebabiesgrowup.com "Who could resist [Jim Benton]?" --PUBLISHERS WEEKLY

Jim Benton is the creator of many licensed properties, some for big kids, some for little kids, and some for grown-ups who, frankly, are probably behaving like little kids. You may already know his properties: It's Happy Bunny (TM) or Catwad (TM), picture book THE END (ALMOST), and

bestselling book series Dear Dumb Diary. Jim lives in Michigan with his spectacular wife and kids. Visit him online at [www.jimbenton.com](http://www.jimbenton.com).

This is a really cute little children's book. I feel the 2-3 age range is a little high. I'd go more 6 months to 2ish. It takes about a minute to read, so long attention spans are not required.

Bought this as a gift for my niece and she LOVES it! So much so that she is always drooling and slobbering on it and tries to it. But she also giggles hysterically at the story, the whimsical pictures, and all of the funny words. PS - the value of this book increases tremendously if the reader of it can do voices. If you read it with the voices, it's hands down one of my nieces favorite books. Just note - voices not included :)

my two year old loves this book & all of the Jim Benton board books

I find this delightful and funny. I bought one for my son and another as a baby shower gift. I am a big cat person and this is just quirky fun! Perfect for a small baby with a short attention span!

This is a good book, but we love Jim Benton's Stinky Socks book better. The kitties are cute.

This book was a suggested book as well. And I just love it! Again, I have never seen it in the bookstores or library. Thank You!

Another great board book by Jim Benton. Our toddler grandson loves robots and this one is unique!

The rhymes and pictures are very nice but don't look too deeply at the subject matter. The robot kitties are everywhere. They appear to have hunted almost all the other animals to extinction. Most disturbing is the complete lack of humans. Humans of course would be no match for an army of robotic predators such as the ones depicted in this book. We are ultimately the architects of our own destruction. Our hubris and hunger for cute kitties pictures must have lead us to create a horde that we could not control. The only saving grace in this post apocalyptic hellscape is that some of the kitties seem to be developing a culture of their own with art and clothing. Most of them however are content to lounge on the furniture of their departed masters.
