Contaminated Sites And Environmental Cleanup: International Approaches To Prevention

Synopsis

Toxic chemicals contaminate land and groundwater on hundreds of thousands of sites in industrialized nations and in many economically developing countries. Past practices, as well as spills, leaks, and illegal disposal, have all contributed to this widely publicized problem. This book presents international policy approaches to prevent toxic contamination, to perform environmental cleanup of contaminated sites, and to redevelop these sites for productive uses. Focusing on experiences with contaminated sites in the United States and several countries in Western and Eastern Europe, *Contaminated Sites and Environmental Cleanup* demonstrates that policies to contend with contaminated lands have both intended and unintended consequences. The book will serve the needs of students and professionals in academia, industry, and government who are concerned with soil and groundwater contamination, remediation strategies, brownfield site redevelopment, and environmental policy making.

Key Features*

- Compares and contrasts international experience with environmental cleanup and reuse of brownfield and other sites*
- Integrates scientific, engineering, public health, economic, political, legal, social, and policy issues*
- Offers approaches to solve problems of toxic contamination for particular reuse objectives*
- Covers an issue of great concern to neighborhood groups, businesses, environmental organizations, and governmental agencies

Book Information

Hardcover: 212 pages

Publisher: Academic Press (February 5, 1997)

Language: English

ISBN-10: 0125435800

ISBN-13: 978-0125435802

Product Dimensions: 9.2 x 6.1 x 0.8 inches

Shipping Weight: 1.2 pounds

Average Customer Review: 4.0 out of 5 stars 1 customer review

Best Sellers Rank: #4,171,596 in Books (See Top 100 in Books) #58 in [Books > Science & Math > Environment > Recycling](#) #1182 in [Books > Engineering & Transportation > Engineering > Civil & Environmental > Environmental > Pollution](#) #2305 in [Books > Textbooks > Engineering > Environmental Engineering](#)
