While browsing my kindle recommended list, I saw this book which catches my attention. Sexting? hmmm I stopped for a while and read the book description and downloaded it after. This book is a guide intended for those persons who wants to know how Sexting works. This terms refers to to an act where you and your partner exchanges naughty and hot messages at the time you are away from each other. There are numerous reasons why people do this kind of activity and this book was able to explain it. The procedure on how to do it properly are provided in here. You won't have a hard time understanding those because they are written in a simple and easy to understand manner. Useful tips and techniques were also provided in here. Nice read!

This book goes into much greater detail on romantic text messaging than the other book in the series. The messages are witty and imaginative and something I would use. Whats great is that there is messages for both him and for her. This book is full of sweet texts which you may want to say but do not know how to word. It will help you start up a relationship in that new world of texting. A great help for any man looking to get know know a girl.

Not quite sure what Kim K is doing on the cover photo maybe the author has an inside source that tells her that Kim K is fond of texting. Cover photo aside, this book contains a lot of really good ideas about how to "spice" things up in your sex life even before you reach the bedroom. To be honest, I've always been curious about sexting. Never really had the chance to try it. Not sure either if my partner is comfortable with the idea but after reading this book I know now how to start without making it awkward.

This is a great book for everyone who want to master sexting. Whether it is with a partner or to flirt this book will definitely teach you something new. I really loved the part with which icons to use when sexting to explain the sexy things you want to say, that was priceless and will be very useful for me. Highly recommended book, that every couple should read to spice up their texts.

Not really a very long book . Wish there was more to it , but what is there is pretty good tips.
