So, I got this product after seeing it in a GenCon add and figured why not. I own some of the other Kobold Guides to World Building and etc so I knew the style of a bunch of different articles from different people. At first I was just going to go to the articles that interested me most but then I just fell into reading each one from front to back, SO WELL DONE! The book tackles playing Evil Characters, how to put weirdness in your games (Think Horror or Lovecraft Weird), Complex

plotting, Doing cliffhangers, and much more. The advice each person gives is super solid and really can fit into any type of RPG game that you would want to run (not just Heroic Fantasy). Keep up the great work Kobold Press!

Wouldn't it be great if you could sit down and pick the brain of some truly great and experienced GMs and game designers and learn how to improve your own GM sessions, whether you're doing prepared modules or homebrewed designs? Well, essentially, that's what you get with this Kobold Guide. Like others in the series, it's collection of essays that cover various topics. The downside to this format is that not everything will be related to what you're interested in. For instance, I ended up highlighting probably half of Kevin Kulp's "Oral Tradition" essay given how many useful tidbits it provided, while other essays weren't nearly as useful. Still, I suspect there's more than enough in this book to make it worth it for GMs of all levels of experience, and the advice is going to apply to any rule system that you happen to play.

Really great methodical planning tool for building out a complete campaign that feels more than just a series of random encounters and subplots. Great ideas for really getting players involved in the story with their own characters and making big decisions that have a true impact on the story and on the game world you are describing for them as the GM.

A collection of great essays by veteran storytellers and DMs on a variety of great and insightful topics! :) Great if you are looking for inspirations, or points of improvement for your D&D campaign

This is a good book full of sort essays by luminaries in the role-playing game industry. They give tips and perspectives about all facets of running a game, My favorite section is by Richard Pett where he takes time to talk about making memorable NPCs. He provides two d50 tables and a sample of how he uses this.
