Customer Reviews

This brief but tightly packed book is a wonderful counterweight to romanticized notions of the so-called Silk Road . . . Foltz masterfully deals with disparate histories from one point of the compass to its seeming opposite, while weaving a wonderfully lucid story of merchants, pilgrims, and missionaries. - *The Journal of Asian History* "Professor Foltz excels at concise explanations of the development of the many religions scattered throughout the central Asian area of the Silk Road . . . Throughout this excellent book Professor Foltz makes clear the importance of trade and cultural exchanges in the unfolding of history." - *Journal of World History* "Foltz takes us on an instructive journey through time and space, revealing the fluidity of barriers, geographical and otherwise, on the historical trail and bypaths of the 'Silk Road,' which stretches from China in the East and across Central Asia to the shores of the Mediterranean in the West." - *History: Reviews of New Books* ". . . an absolute gem . . . well researched and well written, it brings together a huge amount of information in an attractive package." - Jerry H. Bentley, Editor, *Journal of World History* "This was an extraordinary book when it first came out a decade ago; it is an even more impressive work in its revised second edition. What makes Richard Foltz's *Religions of the Silk Road* so unusual and

valuable is that, despite its concise, compressed form and highly readable style, it is packed with an astonishing wealth of fascinating information based on a judicious combination of primary sources and secondary literature. For someone who wishes to learn about the transmission of religious culture along the Silk Road during the past two millennia - including Zoroastrianism, Buddhism, Manichaeism, Nestorian Christianity, Judaism, and Islam - there can be no more convenient and illuminating guide than this extraordinary volume." - Victor H. Mair, Professor of Chinese Language and Literature, University of Pennsylvania "To read this fascinating book is to journey through time, to ride those intriguing stretches of overland trails from Europe to Asia known collectively as the 'Silk Road.' There strands of Buddhism, Zoroastrianism, Manichaeism, Christianity, Judaism, and Islam all intertwined and sometimes converged, making for a time eastern Central Asia the most multicultural region on the planet. Foltz brings to life this amazing history in an authoritative and engrossing way, and entices us into this wondrous early era of globalized religion." - Mark Juergensmeyer, University of California, Santa Barbara; Editor of the Oxford Handbook of Global Religion; President of the American Academy of Religion". . . an excellent text to use in a course on 'Eastern' religions, or on the historical-social-economic-religious development of that part of the world from the eastern Mediterranean across the Eurasian steppe through to China. . . . Foltz writes with a very deft balance and a very even-handed presentation of many different historical periods, geographical circumscriptions, and religious traditions." - Eastern Christian Books Blog

Richard Foltz is Professor of Religion at Concordia University.

Both this and "Spirituality in the Land of the Noble", by Richard Foltz, are excellent depictions of the origins of the major world religions and the cultures associated with them. These two books are very readable and give an image of the millennia long history of Asian civilization, and of the interactions (mostly via Persia/Iran) that enriched European history. It is enlightening to realize that the Jewish people would not have survived to be where they are now if it weren't for Persian King Cyrus, who freed the Jews from the Babylonian captivity. And that archeological finds in what is now western China include images that are clearly Persian/Greek from an era when those civilizations penetrated to China. And that Chinese Buddhist monks traveled to India in the early years CE (AD) to study the earliest Buddhist scriptures. Or that for many centuries Christianity was common in Central Asia, but was almost entirely versions of Christianity contemned as heretical (e.g Nestorian) by the Roman Church Most of us don't know about these backs & forths via the Silk Road. Foltz has given us two very world-enlarging books.

Foltz has a way with words, and can cast a spell that will leave you pondering for days. This is a fabulous little book which is at home with all the religions that slipped along the silk road: Buddhism, Christianity, Manichaeism, Islam, and is able to blend them in a way that the silk road itself did. Crisp, authoritative, easy to read: a jewel.

The Silk Road was an interesting cross-cultural approach to explore the many empires and peoples who were transmitters of commerce and ideas. The author, Richard Foltz, made a superior approach in meeting the many contributions of the Silk Road varied cultures.

This book is a comprehensive look at the ebb and flow of religion in the groups and countries along the silk road. The book is very informative and the content is well organized. It isn't an exciting read (not an entertaining narrative) but it is dense with clear, pertinent information about the transmission of religious traditions of central/east asia.

Book came as described.

Good.

sending you off in all directions for future research Meant for the lay reader, but has enough interesting research to inspire one to learn more and perhaps end up not a lay reader. A slim quality paperback easy to tote about and dip into.

For college course required text.
