We Want Miles: Miles Davis Vs. Jazz

Synopsis

The most comprehensive book on the artist to date, offering an insightful look into the legendary musician and his enormous impact on the development of jazz. Miles Davis explores the life and art of one of the greatest visionaries in jazz history—through photographs, handwritten musical scores, album covers, posters, and more—cementing his reputation as the embodiment of cool, both on- and offstage. To examine his extraordinary career is also to examine the history of jazz from the mid-1940s through the early 1990s, as Davis was crucial in almost every important innovation and stylistic development during that time. His genius paved the way for these changes, both with his own performances and recordings, and by choosing collaborators with whom he forged new directions. Miles Davis—trumpeter, bandleader, and composer—was one of the most important figures in jazz history. He was born in a well-to-do family in St. Louis in 1926 and died in a Los Angeles hospital in 1991. He was at the forefront of several major developments in jazz music, including cool jazz, hard bop, free jazz, and fusion. Davis worked with many of the greatest jazz musicians of all time, including Ron Carter, John Coltrane, Chick Corea, Herbie Hancock, Quincy Jones, Charlie Parker, and Max Roach, among numerous others.

Customer Reviews

"However, the images comprise the main attraction here. Included are nearly every iconic image of the trumpeter—from Don Hunstein's photos of Miles in the studio recording 'Kind of Blue' to Irving Penn's stark and dramatic portrait for the Tutu album cover." ~Jazz

Times" Franck Bergamot's We Want Miles: Miles Davis vs. Jazz is an incredibly thorough look at the life and work of the 'Picasso of Jazz,' one of America's most important musicians. It is touted as a photography book, and it does indeed contain an astounding collection of photos, as well as images of his album covers, concert posters, club flyers, and art he inspired, but it also contains a wealth of writing from people who came into contact with him over his long and storied career." ~Typo-Graphical.com "We Want Miles is much more than a coffee table photobook. It is a complete visual and textual history of every chapter in the iconic horn player's career and ultimately portrays well both the evolutionary and the revolutionary story of this giant of jazz." ~BlogOnBooks.com "This beautifully rendered book is a grand accompaniment to understanding and appreciating a music legend and cultural pioneer whose influence transcends jazz and music in general." ~fest21.com "The most comprehensive and lavishly illustrated volume on the jazz great to date." ~Luxist.com

Vincent Bessières is a member of the French Académie du Jazz and an author and editor who writes frequently and with expertise on jazz. Franck Bergerot is editor-in-chief of Jazz Magazine/ Jazzman. He recently organized a complete collection of Miles Davis's work for the Masters of Jazz label and is the author of several books.

After reading the first few reviews posted and the lavish praise propagated in the product details for this item, lauding it as "the most comprehensive book of its kind", as a fan of the man, music, legend and enduring genius that was / is Miles Davis (he will always be with us), I was excited about adding this book to my collection. I eagerly awaited the arrival of this book, salivating in hopes of seeing the multitude of pictures encased herein that I hadn't seen before. Even more excited in anticipation of seeing never before pics of his incendiary, mercurial quintet from the 60's, featuring what I consider to be the fiercest, most forward-thinking and challenging jazz ensemble that ever existed. Upon reception, my sweaty little palms removed the shrink wrap and I sat down to be blown away by the contents enclosed, but this simply wasn't the desired outcome. I regret to admit my disappointment in the hype and the pictures inside, as I've already seen most of them elsewhere, and certain other spectacular pics I was expecting to see on a larger scale and in finer detail were totally absent in the altogether. One would think that seeing as the sources came from his family, friends, musicians, and legendary photographers from decades of archives that we'd finally get the photographic Holy Grail of the Dark Prince we aficionados have prayed for for decades. Alas, this is simply not the case. Please don't misunderstand me: this is a great book of sorts. As stated by the two reviewers

before me, the text is light and written from a more artistic avenue seeing as it was produced by the Montreal Museum of Fine Art, where it was an installation exhibit that toured around the northern hemisphere to various art galleries and museums, and was noteworthy for taking a musician's life and putting it on both pedestal and display for all. The comparisons between Picasso and Miles and their individualized approach to artistic forms is enjoyable reading you won't get in a Downbeat article for sure. And the abundant wealth of the photos are simply gorgeously reproduced. The book chronicles Miles' life and achievements in a chronological format thankfully, and most of the included text is well-written and precise. If you don't already own four or five books on Miles and have five or six box sets of Columbia's cd's that were issued within the last fifteen years or so, you need to get a copy of this book. Immediately. For the dissolute collectors like myself, it's still essential, but not nearly as comprehensive as touted. There lies my mild disappointment. For instance, we rabid collectors of all things Miles don't need to see album covers we already own reproduced, along with a host of very common photos for the tenth time. For every new, exciting photo of Davis we are treated to, there are two more we've already seen elsewhere. I was anticipating seeing some of the photos from the afore-mentioned Columbia box sets (the Complete 60's Quintet recordings, the Plugged Nickel box, Live at the Blackhawk, Complete Seven Steps to Heaven, etc.) included here in larger form, maybe some additional pics that didn't get included, etc., even some from his late 50's work with Coltrane (though we are treated to a few fab pics of Cannonball Adderly and others from that period). Even his most photographed period from the late 60's / early 70's is under-represented. My apologies to all if I seem hyper-critical here; as I've already stated, this is a great book for most, but for the rabid and militant like me, it was just a bit of a letdown, but that's the inherent problem with things that are over-hyped - they're almost always certain to be a letdown for some. That said, grab this book - We Want Miles! And we want MORE Miles!

Great photos! The images are reminiscent of an era long ago.

This book is completely awesome! From the design to all the information that comes into, I would say that is one of the best books dedicated to one of the masters of blues: Miles Davis. If you love this man, or you want to know about his life and career, I recommend to buy it.

Released in conjunction with an exhibition by the Cite de la Musique (and currently on display at the Montreal Museum of Fine Arts), 'We Want Miles: Miles Davis vs. Jazz' is a unique and all

encompassing look at the more than half-century career of perhaps the biggest name in jazz. This 223 page compendium features a wide array of photographs and accompanying text covering every stage of Miles' career. From the early days as a backline horn player for a host of St. Louis jazz bands, to his relocation and emergence on the lower New York jazz scene, 'We Want Miles' details, in rare photographic brilliance, the ascent of one of the most prolific and oft-times controversial superstars of jazz. Miles' transition from support player to band leader and ultimately star - soloist - frontman, is covered throughout every phase. From his first New York forays into 'hard-bop' with Jackie McLean, J.J. Johnson and Percy Heath, to his first quartet/quintet with John Coltrane, Red Garland, Paul Chambers, Philly Jo Jones (and later Cannonball Adderley) to what may be considered his seminal band with Herbie Hancock, Ron Carter and Tony Williams, to his multiple award-winning albums with arranger Gil Evans, all of Miles' well defined incarnations are chronicled here. Supplemented with text from those involved in the recording, tours or those who knew him well, Franck Bergerot's accompanying storyline reveals the circumstances behind the photographs in a way where both facets fully support each other. (Bergerot is the editor-in-chief of Jazz Magazine as well as the author of 'Miles Davis: Introduction à l'écoute du Jazz Moderne' and the writer of all 53 liner notes contained in the box set 'Miles Davis - The Complete Columbia Album Collection.')

While not as complete as a full text oriented biography, 'We Want Miles' is much more than a coffee table photobook. It is a complete visual and textual history of every chapter in the iconic horn player's career and ultimately portrays well both the evolutionary and the revolutionary story of this giant of jazz.
