Beaufort B. Longest, Jr., PhD, FACHE, is the M. Allen Pond Professor of Health Policy & Management and director of the Health Policy Institute at the University of Pittsburgh. Dr. Longest has authored or coauthored ten books and twenty-eight chapters in other books.

I did not write it but wish I had. I recommend it to students for a course that I teach. It is comprehensive, well written and current.

Purchased as a required text for a Health Policy class. very dry- but easy to understand-lots of examples from Pennsylvania since author is from Pittsburgh-lots of up to date information from 2009-2010.... but that is where it stops- so be prepared- some things are out of date already.

A wonderful resource to truly help you understand the policymaking process in the health arena, as well as the world at large.

Very interesting book... although pricey. A must have when taking the Health Policy course in graduate school.

Very dry like most text books are, but very informative if the topic applies to you and your profession.

This textbook is insufferable. Dry and circuitous in delivery, you will be exposed to cool and nifty frameworks and models without actually learning anything substantive. If I didn't have a great instructor who deviated from the text and expanded on the substance, I would have been lost. There is also a glaring typo on page 124.

I purchased this book for a class I am taking this semester. I purchased the text because it was required for the course. I have found the text to be very helpful and an easy read.

Got it for my husband's class. It came in very handy. He referred to it a lot throughout his class.
