Math Fundamentals 3 (Quickstudy: Academic)

World's #1 Academic Outline

Quick Study ACADEMIC → **Math Fundamentals 3** Algebraic Equations & much more!

What is Algebra? Mathematics (abbreviated, *math*) is a form of science that deals with numbers—number theory, operations and measurements, all are part of mathematics. **Fundamentals are essentials or basics**—something that a thing or system needs to make it work.

OPERATIONS

Operation	Solution
+	addition
-	subtraction
×	multiplication
÷	division

Order of Operations

- G**rouping symbols – solve inside grouping symbols first; grouping symbols include (), [], { }, $\bar{}$
- E**xponents – always set exponents (i.e., above integer) (i.e., 10^2 , 10^3)
- M & D** Multiply & Divide – in the order of appearance (i.e., first come, first served)
- A & S** Addition & Subtraction – in the order of appearance (i.e., first come, first served)

Decimal Operations			Integer Operations		
Use the technique!	Process	Examples	Signs	Process	Examples
+	Line up decimals. Add normally. Drop decimal straight down in sum.	$23.05 + 128$ change to 23.05 $2,000$ $2,023.05$	+	Answer keeps same sign. $pos + pos = pos$ $neg + neg = neg$	$-3 + -4 = -7$
-	Line up decimals. Subtract normally. Drop decimal straight down in difference.	$9.887 - 3.672$ change to 9.887 -3.672 6.215	-	Subtract the numbers. Keep sign of number with greatest absolute value. $4 + 3 = 5$ (if has greatest absolute value, so answer is negative)	$4 + 3 = 5$ (if has greatest absolute value, so answer is negative)
×	Multiply normally. Count places to right of all decimals in problem. Move decimal to left same number of places in solution.	31.2×27 change to 31.2 27 8.424	+	"Add the Operands" – change to addition; use opposite of 2nd integer; follow addition process.	$3 - (-4)$ change to $3 + 4 = 7$
÷	If NO decimal in dividend, divide normally. Bring 0 if decimal from dividend into quotient. If decimal in dividend, move decimal in divisor to right to create whole number. Move decimal in dividend same number of places. Bring 0 if decimal from dividend into quotient.	$20.5 \div 5$ change to 20.5 5 4.1 $75.2 \div 6.25$ change to 75.2 6.25 12.048 $425 \overline{) 7530.00}$	-	Positive product $pos \times pos = pos$ $neg \times neg = pos$	$4 \times 3 = 12$
			×	Negative product $pos \times neg = neg$ $neg \times pos = neg$	$-4 \times 6 = -24$
			+	Positive quotient $pos \div pos = pos$ $neg \div neg = pos$	$24 \div 4 = 6$
			-	Negative quotient $pos \div neg = neg$ $neg \div pos = neg$	$27 \div -9 = -3$

Customer Reviews

BarCharts always has great products. Very useful for a quick reference guide when studying or preparing for tests. Great for various age/grade levels. Good to have on hand for quick reference.

I pulled this for a quick desk reference and now my son has decided he likes it. I find these guides very clear and for someone who has done a lot of math in the past it is a perfect reminder to get the brain to recall long lost knowledge.

Hey, I love math. This is a good study to keep the mind working.

Extremely useful!

Great reference for elementary maths.

All good thank you

I have a 14yr old that I home school and he is having trouble with Math. These charts are very detailed and self explanatory and I would encourage anyone struggling in Math to try these out. They really do help. The cost is very low and they deliver very very quickly!

Ordered for grand kids, their parents couldn't put it down. Excellent gift.
