Better Public Transit Systems: Analyzing Investments And Performance

Synopsis

Better Public Transit Systems is a complete primer for performance and investment analysis of public transportation. Whether youâ ™re planning a major new public transit project, an extension or expansion of an existing system, or evaluating the needs of your current system, this book provides the tools you need to define your goals and objectives and conceive and analyse design alternatives. This completely revised Second Edition includes new material for students and online discussion questions, whilst remaining an essential reference book.

Book Information

Hardcover: 400 pages

Publisher: Routledge; 2 edition (November 1, 2013)

Language: English

ISBN-10: 0415706009

ISBN-13: 978-0415706001

Product Dimensions: 6.6 x 1 x 9.4 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars   1 customer review

Best Sellers Rank: #818,556 in Books (See Top 100 in Books)   #96 inÂ Books > Engineering & Transportation > Transportation > Mass Transit   #893 inÂ Books > Arts & Photography > Architecture > Urban & Land Use Planning   #182767 inÂ Books > Textbooks

Customer Reviews

"An attractive and appreciated aspect of this book is Bruunâ ™s balanced approach. Skillfully the book demonstrates that modelling is a prerequisite for better public transport, but at the same time it warns against the implications of using sophisticated models." â " Moshe Givoni, Transport Reviews, Tel-Aviv University, Israel "This is a very useful book, offering guidance on the planning and evaluation of major new public transit projects, and will be of interest for undergraduate and postgraduate students, academics and practitioners. It covers many important dimensions not previously brought together in one publication, including route and network analysis, modesplit estimation, space requirements, cost modelling and contract models." - Robin Hickman, University College London, Urban Studies Â

Eric Christian Bruun currently teaches transportation engineering, planning, and modeling at Aalto University in Finland and is a guest lecturer at other universities. He has managed and participated

in numerous international consulting projects. Eric has Bachelor and Master of Science degreesÂ in Mechanical Engineering from the University of Washington and a PhD in Systems Engineering from the University of Pennsylvania.

Exactly what an economist needs.
