ISBN-13: 978-1404811164

Product Dimensions: 0.2 x 10.5 x 8.8 inches

Shipping Weight: 2.4 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 9 customer reviews

Best Sellers Rank: #162,442 in Books (See Top 100 in Books) #26 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Gardening](#) #2584 in [Books > Children's Books > Science, Nature & How It Works](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 2

Customer Reviews

Reviewed with Michael Dahl's *One Big Building*. PreS-K. These Know Your Numbers titles are a pleasant departure from the cartoonish artwork and uninspiring design exhibited by many picture books in series. They feature inviting, bright illustrations that liven up a potentially dry topic--counting--with enticing, real-world situations: building a skyscraper, harvesting vegetables to make tossed salad for dinner. Though both books are well done, *Building*, perhaps, shines brightest. Little ones will find Ouren's bustling workers and vehicles in bold primary colors mesmerizing, and they'll love counting all 12 stories of the finished building, so tall that the horizontally formatted book must be rotated 90 degrees to accommodate a picture of it. The inclusion of a glossary, an index, and Web resources seems like overkill for an audience this young, but other extra features are more thoughtfully conceived. Sidebars depict each number in three different ways--as a word, a digit, and a series of dots--and the numerals hidden somewhere on each spread will keep children engaged. Counting, hidden numbers to find, and fun facts are included in these two books. The first one presents 11 vegetables, from 1 tomato to 11 peppers, resulting in 12 plates of salad for a family. Each page records the harvesting with sentences featuring 11 --School Library Journal

My 3 1/2 year old daughter loves to find the hidden numbers in each picture. She wants to read this book over and over. We first found it at our library. When it was time to return it she asked if we could "own' it. I knew it was a winner!

I know my nieces and nephews will enjoy looking at this book. They love gardening and the bright illustrations will hold their attention. Counting the pieces of vegetables is a clever way to learn their numbers.

This is a cute book and I am happy with it. Wish it had more pictures of actual gardens. Looking for one that shows kids watering and planting seeds. Not bad for the price.

I purchased this book as part of a grant on gardening. I wanted to add literacy to the process of raising our own vegetables. It is a great counting book as well and at the end they put a salad together....something children don't always like.

Love this book!

It was not the quality I expected. And it was too young for my 4 year old granddaughter

Odd examples

This is a great book. The kids really love it and can't put it down. Highly educational and I recommend.
