Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone creates a wide range of educational materials to supplement every curriculum.

Many Great Pictures for your child to work on to help boost Confidence in what to expect for School

Nice book. Kids love it. There are quite a few books similar to these activity books. So nothing against anyone. You wouldn't really go wrong buying this one or anything else that encourages kids to read and write and help fine tune their fine-motor skills.

This book is great! For the price I thought it would be those tan cheap coloring book pages but it's not! It's crisp white pages, printed clearly and really nice. The activities are great for my 3.5 year old. This book would make a great gift too.

This isn't exactly what I've been looking for. And it doesn't have much for learning just numbers.

I would have given this a 5 star, but when the Tracing Fun book I ordered suggested this book I thought it was part of the wipe clean series. Sadly, it wasn't. However, the book is still great for my little guy whose heading to VPK in the fall.

Love the pages that I've looked at so far. It's very similar to the work that my son is doing in his preschool class now and will be a fun way to keep him busy this summer!

I did not like this because it started off wanting to teach the abc's and writing them and for my 3 yr old I needed more of mazes and teaching on how to draw straight lines first.

I am learning the ins and out of homeschool with my 3 year old and am using this book as part of our curriculum. I felt the price was more than fair for the material that comes in this book. He really enjoys "playing school" and looks forward to us working together in this book. While some of the lessons are a bit advanced for him, I can totally see him mastering them within the next year or so.
