Oscar And The Cricket: A Book About Moving And Rolling (Start With Science)

Synopsis

Start with Science books introduce kids to core science concepts through engaging stories, fresh illustrations, and supplemental activities. One day Oscar sees a ball in the grass. "Try pushing it!" says Cricket. Oscar learns that the ball rolls slowly in grass and faster on a path, until it bounces off a tree and changes direction. Some things need a push to move, and others use their muscles to move themselves – and to move plenty of other things, too.

Book Information

Lexile Measure: 500 (What's this?)

Series: Start with Science

Paperback: 32 pages

Publisher: Candlewick (September 22, 2009)

Language: English

ISBN-10: 0763645125

ISBN-13: 978-0763645120

Product Dimensions: 7.1 x 0.2 x 10.3 inches

Customer Reviews

Geoff Waring has worked as a graphic designer and is the illustrator of **BLACK MEETS WHITE** by Justine Fontes. He says that the Oscar books are based on his own cat. He lives in London.

I love this book! It is very educational and gives ideas to teach children about push, pull, and how objects move. I would highly recommend this book for teaching preschoolers.

My students in Pre-K thoroughly enjoyed the characters.

My 3 year old love the Oscar books. They are written well and explain scientific principles in easy to understand terms. My son frequently request the "Oscar books" at bedtime and they have become a favorite for giving as gifts.

This book is a fun introduction to science! I love books that show kids that learning is fun and engaging and doesn't have to come from a stuffing text book. And this book points out how simply things can be explained too! Way to go!
