# Language Intervention Strategies In Aphasia And Related Neurogenic Communication Disorders

## Synopsis

This thoroughly revised and updated Fifth Edition is the most comprehensive resource on aphasia and related neurogenic communication disorders from the most distinguished authorities of our time. This classic text has been used by graduate speech language pathology students for over 25 years, and continues to be the definitive resource across the speech sciences for aphasia. The book describes a wide range of intervention strategies including team treatment, group therapy, approaches for bilingual and culturally diverse clients, augmentative and alternative communication, and computer-assisted interventions. An important section addresses psychosocial/functional approaches to intervention. New to this edition are Activities for Discussion that encourage students to reflect on what they just read.

## Book Information

Hardcover: 1091 pages

## Customer Reviews

This book should be used for individuals who'd like to specialize in Aphasia only. Possibly, for those working on their doctorate. Chapter four needs to be broken up into 2-3 chapters.

This book is a great reference. I used it in grad school and will be leaving it on my bookshelf for future reference!

A bit verbose on the topics given, and organizationally the chapters did not really relate to one another too much, but references are well cited.

great product & came as described!

Wonderful and comprehensive book! Great reference.

Huge book, choc full of stuff. You'll learn a lot by reading this. But... I also ordered Brookshire's book on neurogenic communication disorders, which we are using for class. Chapey's book has become my book shelf reference.

I definitely recommend this product, it is very useful in the field of Speech Pathology in my opinion and is very concise. I appreciate the detail the author went into and I look forward to using it in my future career.

nice
