Customer Reviews

I was pleased to be given the opportunity to review the third edition of Comprehensive Clinical Nephrology, the goal of which is to provide 'comprehensive coverage' of contemporary nephrology. All chapters have been extensively revised and updated. Furthermore, a new chapter on Intensive Care Unit Nephrology has been added. Whilst primarily aimed at clinicians, the superb readability of the text, combined with excellent illustrations, broadens its appeal to the wider renal care community. The CD-ROM, containing images from the textbook, may be used for educational purposes. In conclusion, this is an excellent clinical and educational resource that I can thoroughly recommend to all members of the multidisciplinary team involved in the day-to-day care and management of renal patients. *Journal of Renal Care*, June 2008

This is one of the most easy-to-read nephrology text books I have come across. Although it was bought to be used as a reference book, very often I end up reading the whole chapter or even chapters as the text simply flows and effortlessly makes the subject very interesting. It manages to make complex subjects easy to understand and interesting without making it simplistic. It also provides an excellent overview of all the relevant clinical studies and guidelines. I would thoroughly recommend it.

This is an extremely useful book that is an asset for every training nephrologist but also as a reference to anyone involved in Nephrology. Well organised chapters and excellent illustrations. Accompanied by a CD-ROM that carries all the figures that can be used for presentations. I would strongly recommend it.

I have trained with one of the docs that wrote a chapter in this book and also used it during my fellowship. It is a pleasant book to read. I liked the contents that is very informative and relating the important info you need for boards but some chapters will need some deeper info. Still lighter weight than the B-----r. I recommend it but I will complement it with some additional info especially in acid

base department.
