We first bought the "My First Words: Let's Get Talking" book by DK publishing. It was the only book our toddler liked. So at about 20 months when language development was really taking off, we also purchased "My First Busy Home", "My First Animals", "My First Colors" and "My First Farm". All of them are great. I will repeat what another reviewer said, some of the photographs are reused in the books, but not so that you feel like it's the same book. The pages are bright, colorful and filled with photographs of real things, not illustrations (that was important to us)! Our toddler's favorites are the

Animals and Farm book, followed closely by the Words and Busy Home book. Colors is currently at the bottom of the list. If your toddler is as rough on board books as ours is, I'd recommend reinforcing the spine with packing tape. That's not a fault of these books, just well-used board books in general!! also read someone complain about the Farm book having milk and cheese on the goat and cow pages, but no bacon on the pig page. To clarify, NONE of the animal pages show meat products of farming. There's wool for the sheep page; eggs from chickens and geese; milk and cheese from goats; and milk, cheese and butter from cows. There aren't any lamb chops or steaks shown, so it's consistent- only non-meat products of animal husbandry are shown. I personally don't have a problem with it.

This is my favorite "my first" book. The pictures are vibrant and interesting to my toddlers. I like how it's organized and each color is prominent & obvious in its depiction, unlike some other books that can be confusing to little ones.

This is a great book using bright colors. The tabbed board is perfect for my young students with some physical limitations. It really holds their interest.

Great book. Lots of colors and things for my kid to look at and learn from. Well made board book. It's a good size book, not a flimsy small book like some others I've received. Highly recommend!

Love this book so much! Some of the objects are a bit much for a young child to know what they are, but we made due.

The only color book we have for our kids is one of those tiny 1.5 x 1.5 ones. I had seen the number version of this book before, and while I wasn't interested in purchasing that one, I was interested in both colors & "first words". I love these books! I love the tabs, so if your child is interested in a specific page you can quick-flip there. My husband uses the tabs to turn the pages, says it's easier than normal books that way. It's a really nice size. I like all the different objects pictured, that they're labeled (some objects in our other colors book are hard to identify tbh). I love love love love love colors! And this book :)

Lots of great pictures, including some items that go beyond the standard stuff you see over and over again in similar picture books. My son loves it!

This is a great book for toddlers. My daughter received it for Christmas when she was 17 months. It quickly became one of her favorite books. Each color page is filled with a ton of objects which helped her learn a ton of extra words while learning her colors. We read it so much that she has the items memorized and will say she wants to find the fork and go through the pages to find the item (which is easy for her to do since each page is tabbed). The last page in the book is kind of an I spy page and she loves that page too. I really cannot say enough good things about this book!
