Handbook Of Mites Of Economic Plants: Identification, Bio-ecology And Control

Synopsis

Mites pose a serious problem to plants worldwide, attacking crops and spreading disease. When mites damage crops of economic importance the impacts can be felt globally. Mites are among the most diverse and successful of invertebrates, with over 45,000 described species, with many more thousands to be discovered. They are responsible for a significant portion of the losses of crops for food, fiber, industry and other purposes, and require expensive and often controversial pest control measures. Understanding these mites is vital for entomologists, pest researchers, agronomists and food producers. Knowledge of mite pests helps to inform control strategies and optimize the production of economic plants and the agrarian economy. This handbook provides thorough coverage of the mites and the problems they cause to crops, yet it is easily searchable, organized by mite species and subdivided into helpful headings. It takes a worldwide view of the issue of mites injurious to economic plants, describing mites prevalent in different regions and discussing control methods appropriate in different environments. This book provides an encyclopedic reference to the major mites, described by family in terms of their internal and external morphology, bio-ecology and family systematics. Methods of mite collection and laboratory study is described, as well as species diagnostic characteristics, worldwide distribution, host plants, identification by the type of damage they cause and control strategies, including chemical and biological intervention and integrated pest management measures. Mites of the following families are included: Eriophyoidea, Tarsonemidae, Tuckerellidae, Tenuipalpidae, Tetranychidae, Acaridae, Penthaleidae. The Handbook of Mites of Economic Plants is an important resource for students of entomology and crop production, and as a thorough reference guide for researchers and field workers involved with mites, crop damage and food production.

Book Information

Hardcover: 832 pages

Publisher: CABI (February 10, 2016)

Language: English

ISBN-10: 1845939948

ISBN-13: 978-1845939946

Product Dimensions: 8.8 x 2.1 x 10.9 inches

Shipping Weight: 6.7 pounds (View shipping rates and policies)

Customer Reviews

“A precious work from an acarological point of view. Dr. Vacante has put together the best world literature on Eriophyids of economical importance... He is to be highly praised for it.”
(Carlos H.W. Flechtmann)

Vincenzo Vacante is at Mediterranean University, Italy.
